BIOLOGICAL ABSTRACTS
University of Pennsylvania
38th and Woodland Avenue
PHILADELPHIA, PA., U.S.A.

BOTANICAL ABSTRACTS

Continued, beginning with the literature of 1926, in BIOLOGICAL ABSTRACTS

The final issue of BOTANICAL ABSTRACTS (Vol. 15, Nos. 7-11) appeared in November, 1927. This issue covers as completely as feasible the botanical literature published before 1926, thus articulating with Biological Abstracts, which begins with the biological literature of 1926.

Prices for BOTANICAL ABSTRACTS, postpaid, are as follows: Volumes 1 and 2 cannot be supplied. Volumes 3-10, inclusive (each covering about one-third year and containing approximately 325 pages), domestic, $8; Canada, $8.12; other countries, $8.25. Volumes 11-15, inclusive (each covering a year and containing approximately 1200 pages), to LIBRARIES AND INSTITUTIONS, domestic, $10; Canada, $10.50; other countries, $10.80; to INDIVIDUALS, $5. Single copies may be obtained at a price of $1 each.

INDEX

Cumulated subject and author indexes for Volumes 1 to 10, inclusive, are available in a single bound volume. Price to LIBRARIES AND INSTITUTIONS, postpaid, paper-bound, $12; buckram-bound, $13. To INDIVIDUALS, paper bound, $5; buckram-bound, $6.

Indexes to Volumes 11-15 have not been published.

BUSINESS COMMUNICATIONS

All business communications should be sent to J. H. Ehlers, Business Manager of BOTANICAL ABSTRACTS, Natural Science Bldg., Ann Arbor, Mich. Checks should be made payable to "BOTANICAL ABSTRACTS."

PUBLICATIONS NOW AVAILABLE

The Academy of Natural Sciences of Philadelphia (Founded 1812) is making available to interested students copies of an increasing number of contributions on the natural sciences, which appeared prior to 1909 in the "Proceedings" and other serials of the Academy.

Price lists of these and such more recent publications as are available as separates have been prepared, arranged by subjects. Copies of these price lists will be mailed upon request, stating the general subject or subjects desired. The prices placed upon the respective separates are based entirely upon the number of pages of letter press and illustrations, plus a proportionate increase in the case of those papers of which but a limited number can be supplied. These lists will be supplemented by subsequent issues as additional separates become available.

Many of the papers now listed are virtually unobtainable from book dealers, except by the purchase of entire volumes of the "Proceedings."

Complete volumes of all recent issues of the "Proceedings" and most of the earlier ones can be obtained at $6.00 each, or $4.00 to regular subscribers, postpaid. Prices of volumes of the "Journal," first and second series, of the "Special Publications"; and of the "Manual of Conchology" furnished upon application. Information as to availability will be supplied concerning any particular publications which have appeared from or through the Academy.

VOLUME 9 | DECEMBER, 1935 Entries 20598-20660; Indexes | NUMBER 10

MAMMALIA

Editor: G[E]T S. MILLER. Associate Editor: REMINGTON KELLOGG

20598. ALLEN, GLOVER [M]**pe specimens of mammals in the Museum of Com**[pa]**ve Zoology.** *Bull. Mus. Comp. Zool.* 71(4): 227-28[5]. 1.—A list of the types or cotypes forming the basi[s] 99 names of both fossil and recent mammals. The [in]nation concerning each includes the original refere[nce] nature of the specimen, catalogue no., locality, da[te] llector, and equivalent name in current nomenc[la]ture (if different from the original name).—*F. H.*

20599. BAKER, FRANK [C.] **A new mammoth record for Illinois.** *Science* 80(2[0]8): 118. 1934.—Lower jaw, with teeth intact and 2 up[per] t molars of a Pleistocene *Elephas primigenius bore*[us] lived in the Sangamon interglacial interval, and [was] apparently 6 yrs. of age. —*A. G. W.*

20600. BARBOUR, [E.] HINCKLEY, and C. BERTRAND SCHULTZ. [A] w antilocaprid and a new cervid from the late Ter[tiary] **of Nebraska.** *Amer. Mus. Novitates* 734. 1-4. 1 pl. 1[934]. **PROANTILOCAPRA** [Antilocapridae] (p.3), near[est] irect ancestral line of *Antilocapra*, type *P. platy*[cera]* (p.3), skull and other skeletal elements, Lr. [Pl]e; *Dromomeryx* **trigonocorneus*** (p.4), ? Up. [Pl]e.

20601. BEAUFORT, [L.] e. Dasypterus intermedius H. Allen in Cuba. *Jou*[r.] *mmal.* 15(4): 316. 1934.—First record of the genu[s] uba.

20602. BENSON, S[.] . Description of a race of Dipodomys merriami [from] **Arizona.** *Proc. Biol. Soc. Washington* 47: 181-18[4].—*D. m.* **vulcani** (p.181); *D. m. merriami* Mearn[s] *D. m. olivaceus* Swarth).

20603. BENSON, S[.] . Descriptions of two races of Perognathus intern[edius] **from Arizona.** *Proc. Biol. Soc. Washington* 47: 1[9]. 1934.—*P. i.* **crinitus** (p.199), Arizona (type) and U[pper] *P. i.* **umbrosus** (p.200), Arizona.

20604. BERCKHEM[ER], F. Notiz über den Fund eines Urmenschenschädels i[n] **Schottern von Steinheim a. d. Murr.** *Palaeont. Ze*[it.] 15(2/3): 224. 1933.—Records the discovery of a hu[man] kull of Neanderthal type in a deposit of Steinheim [in] lacial age.

20605. BHIDE, P. [N.] **Notes on some rats damaging crops in Khandesh an**[d] **Deccan.** *Agric. and Live-stock in India* 4(3): 275-[8] pl., 4 fig. 1934.—The 3 spp. of rats, in order of d[estr]iveness to crops in Khandesh, are *Gunomys kok*, *Mia meltada* and *Tatera indica*. A correlation betwe[en] infall and increase in the rat population is indica[ted] umigation as a control measure seems fairly success[ful] pecially with *Millardia*.—*C. V. Green.*

20606. BOAS, J. [E. V.] **Über die verwandtschaftliche Stellung der Gattu**[ng] **tilocapra und der Giraffiden zu den übrigen Wiederk**[äuern.] *K. Danske Videnskab. Selskab. Biol. Medde*[l.] 1(3): 3-15. 3 pl. 1934.—Some skeletal characters atomical characters of soft parts of pronghorn and [gi]e show affinity with the deer, others with the C[a]nia. The pronghorn arose from the deer, through giraffe, and is the forerunner of the Cavicornia. *Mus* shows close affinity with Cavicornia but it also originated with the deer, by way of the giraffe.—*O. J. Murie.*

20607. BORISIAK, A. A. O novom mastodonte iz nizhne-mioſsenovykh otlozheniĭ Kazakstana. (A new Mastodon from the Lower Miocene sediments of Kazakstan.) [In Russ. with Eng. summ.] *Doklady Akademii Nauk SSSR, Novaĭa seriĭa (Compt. Rend. Acad. Sci. URSS, nouv. sér.)* 1. 34-39. 1 fig. 1933.—*Mastodon* (*angustidens* var.) **atavus*** (p.34), Jilančik beds of the Turgai continental deposits, descr. from complete body and limb skeleton, lower jaws, and 4 tusks.

20608. BROWN, C. EMERSON. Captive pigmy elephants in America. *Jour. Mammal.* 15(3): 248-250. 1934.—Notes on rate of growth of a captive *Elephas cyclotis* that attained a height of 6 ft. 7 in. at an age of about 11 yrs.

20609. BRUCE, H. M., and E. HINDLE. The golden hamster, Cricetus (Mesocricetus) auratus Waterhouse. Notes on its breeding and growth. *Proc. Zool. Soc. London* 1934(2): 361-366. 1934.—General descr. of the growth and reproduction of a stock kept for 8 generations under laboratory conditions. The gestation period averages 16 days. There are 6-7 young per litter. Sexual maturity is attained at 7-8 weeks.

20610. BURT, WILLIAM HENRY. A new rice rat (Oryzomys) from Sonora, Mexico. *Proc. Biol. Soc. Washington* 47: 107-108. 1934.—*O. couesi* **lambi** (p.107).

20611. CHAPPELLIER, A. Le rat musqué (Ondatra), biologie et lutte. *Ann. Epiphyties* 19(3): 143-184. 2 pl., 9 fig. 1933.—The text is taken from the pamphlet which appeared under the title *"La lutte contre le Rat musqué"* (No. 1 of the "Collection de Monographies," Inst. Agric. Research. 72pp., 4 pl., 25 fig., 1933). In the first part the biology of the muskrat is summarized. The animal is descr. and represented together with the other spp. with which it is sometimes confused (nutria, brown rat, water vole). The 2d part of the text is devoted to the fight against the muskrat: the different means employed are descr.; especially traps and the virus (*Bacillus typhi murium*). In conclusion, there is an analysis of the texts of French and foreign legislation controlling the fight against the muskrat.—*A. Chappellier* (*tr. by C. V. Green*).

20612. CHAWORTH-MUSTERS, J. L. A note on the nomenclature of two sciurids from eastern Siberia. *Ann. and Mag. Nat. Hist.* 13(77): 555-557. 1934.—The type locality of *Eutamias asiaticus uthensis* (Pallas) (=*Tamias orientalis* Bonhote) is shown to be the Uda R., NE. Siberia. *Spermophilus leucostictus* Brandt is removed from the syn. of *Citellus suslica*, and the name will stand as *Citellus eversmanni leucostictus* (Brandt) (=*C. buxtoni* J. A. Allen).—*F. H.*

20613. CHAWORTH-MUSTERS, J. L. A note on the nomenclature of Phodopus sungorus (Pallas) and its geographical races. *Ann. and Mag. Nat. Hist.* 13(78): 590-591. 1934.—A distr review of the 3 recognized races of *P. sungorus* (Pallas) (=*Mus songarus* Pallas).

P. s. **campbelli** (*Cricetulus c.* Thomas) (p.591); *P. s.* **crepidatus** (*P. c.* Holl.) (p.591).—*F. H.*

20614. CHAWORTH-MUSTERS, J. L. A note on the nomenclature of the species of the "subtilis" group of the genus Sicista. *Ann. and Mag. Nat. Hist.* 14(83): 554-556. 1934.—In this group, of E. Europe, Russian Turkestan, and W. Siberia, 6 forms are recognized: *S. subtilis subtilis* (Pallas); *S. s. loriger* (Nath.); *S. s. trizona* (Petenyi); *S. betulina betulina* (Pallas); *S. b. montana* Mehely; *S. b. norvegica* Chaworth-Musters.—*F. H.*

20615. CLARK, W. E. Le GROS. On the skull structure of Pronycticebus gaudryi. *Proc. Zool. Soc. London* 1934(1): 19-27. 3 fig. 1934.—This skull was compared with the recent and fossil primate material in the Brit. Mus. The author concludes that it is derived from a very early primate, definitely a member of the lemuriform group; that it is not a primitive tarsoid as stated by Stehlin and others who based their opinion on dental characteristics alone.—*E. M. MacEwen.*

20616. COCKERELL, T. D. A. South American Canidae. *Jour. Mammal.* 15(3): 243. 1934.—Proposes to divide American Caninae into 2 tribes: Canini Fischer (restricted), type *Canis* L., and **CHRYSOCYONINI**, type *Chrysocyon* H. Smith.

20617. COKER, ROBERTO E. La caza de lobos en el Perú. [Hunting seals in Peru.] *Bol. Comp. Admin. Guano* 9(8): 223-245. 4 fig. 1933.—Lima, Peru. Observations concerning the interrelations of sea-lions and guano-producing birds and the significance of sea-lions as producers of commercial guano. Sea-lion guano is small in quantity and low in quality. The supposition that sea-lions are seriously inimical to the guano-producing birds has no material foundation. The idea that sea-lions are significant and perhaps essential aids to fish-consuming birds by herding small fish to the surface is also found to be unsupported by such observations as could be made in course of a year. The general conclusion is that there was no occasion either for efforts to exterminate the sea-lions or for stringent protective measures. Some compiled information regarding sea-lion, whale, and porpoise fisheries is appended. This is a reprint of an article published in the Bol. Ministerio Fomento, Dirección de Fomento, 5(12): 64-95; 1907, Lima, Peru.—*R. E. Coker.*

20618. DAVIS, WILLIAM B. A study of the Idaho jumping mice of the genus Zapus, with remarks on a few specimens from British Columbia. *Jour. Mammal.* 15(3): 221-227. 1 fig. 1934.—Systematic review of 5 Idaho sspp. of *Z. princeps*, including *Z. p.* **idahoensis** (p.221). Tax. notes on *Z. p. saltator*, of Brit. Columbia.

20619. EISENTRAUT, M. Markierungsversuche bei Fledermäusen. *Zeitschr. Wiss. Biol. Abt. A, Zeitschr. Morph. u. Ökol. Tiere* 28(5): 553-560. 1 fig. 1934.—Tagging experiments were begun in 1932. Many bats caught in their winter sleep were tagged by an aluminum band around the distal end of the radio-ulna. A few were recovered in the summer 25-100 km. from the tagging place. In the winter many tagged bats returned not only to the same caves but even to the same part of the cave previously occupied. Bats transported during their winter sleep from caves A to B, both near Berlin (42 km. apart), returned the next winter to hibernate in A.—*L. H. Hyman.*

20620. FLEROV, CONSTANTINE C. A new Paleolithic reindeer from Siberia. *Jour. Mammal.* 15(3): 239-240. 1 pl. 1934.—*Rangifer* **constantini** (p.239), skull*, Solutrean.

20621. FRIANT, MADELEINE. Sur les affinités de l'Issiodoromys, Rongeur de l'Oligocène d'Europe. *Comptes Rend. Acad. Sci. [Paris]* 197(19): 1059-1061. 1 fig. 1933.—The Middle Oligocene European rodent *Issiodoromys* has been classed by authors with the Caviidae because of supposed similar structure of the teeth. Unworn molars of *Issiodoromys* have a peculiar structure of cross-crests quite unlike that of cavid molars, and approaching the molar structure of the Tertiary Theridomyidae. *Issiodoromys* is thus to be considered as an advanced theridomyid. In the Caviidae molar abrasion commences before birth, but this evidently was not the case in *Issiodoromys*. This genus cannot be used as evidence of a south Atlantic land bridge in Tertiary time.—*L. S. Russell.*

20622. GOODWIN, GEORGE G. Two new mammals from Kazakstan. *Amer. Mus. Novitates* 742. 1-2. 1934.—*Crocidura suaveolens* **mordeni** (p.1); *Microtus* **gravesi** (p.2).

20623. GOODWIN, GEORGE G. Mammals collected by A. W. Anthony in Guatemala, 1924-1928. *Bull. Amer. Mus. Nat. Hist.* 68(1): 1-60. 5 pl. 1934.—A report on 1000 mammals, including 74 spp. and sspp., providing a good representation of the mammalian fauna of central and southern Guatemala. The specimens represented are from such diverse regions as the lofty mountain ranges in western Guatemala; low coastal plains of the Pacific; hot, dry, arid regions and dense tropical forests of central Guatemala. Typical specimens of several spp. secured near some of Salvin's old stations are now made available for the first time in American collections. This bulletin covers descriptions, measurements, and field notes of the collection.—*G. G. Goodwin.*

20624. GRINNELL, JOSEPH. A new pocket gopher from Lassen County, California. *Proc. Biol. Soc. Washington* 47: 193-197. 1934.—*Thomomys bottae* **saxatilis** (p.193), with remarks on the sharp delimitation of the ranges of spp. of *Thomomys* by the factor of soil texture.

20625. GYLDENSTOLPE, NILS. A manual of Neotropical Sigmodont rodents. *K. Svenska Vetenskapsakad. Handl.* 11(3): 1-164. 18 pl. 1932.—A compilation based on the literature and on original observation of the type specimens and representative series of Neotropical Cricetidae at the museums of London, Copenhagen, and Stockholm. Approximately 60 genera are recognized, a few being signaled by the author as of dubious status. The paper will be found particularly useful to workers in the U. S. A. from the fact that the author has for the first time published good illustrations of the skulls of numerous species in the collections of the Brit. Mus. No pictures of Brit. Mus. types appear, however. Notes dealing with material in German museums are absent, as explained by the author in his preface. Tables of measurements of type specimens of most spp. are appended. On plate XVIII, by means of diagrams, the author illustrates his views on dental homologies in the S. Amer. cricetids.—*G. H. H. Tate.*

20626. HALL, E. RAYMOND. A new pika (mammalian genus Ochotona) from central Nevada. *Proc. Biol. Soc. Washington* 47: 103-105. 1934.—*O. princeps* **tutelata** (p.103).

20627. HALL, E. RAYMOND. Mammals collected by T. T. and E. B. McCabe in the Bowron Lake region of British Columbia. *Univ. California Publ. Zool.* 40(9): 363-386. 1 fig. 1934.—Systematics and geographic distr. of the 45 kinds of mammals collected. *Canis latrans* **incolatus** (p.369), Brit. Columbia to Alaska. The mammal fauna is characterized by the presence of a high percentage of Rocky Mountain forms, among which those from the southern part of the Rocky Mountains predominate.—*E. R. Hall.*

20628. HIBBARD, CLAUDE W. A new Bassariscus from the Lower Pliocene of Nebraska. *Kansas Univ. Sci. Bull.* 21(paper 7): 273-278. 1 pl. 1933.—*B.* **ogallalae*** (p.273), type locality Ogallala formation, part of lower jaw with dentition.

20629. HIBBARD, CLAUDE W. Antrozous bunkeri, a new bat from Kansas. *Jour. Mammal.* 15(3): 227-228. 1934.

20630. HILL, JOHN ERIC. External characters of newborn pocket gophers. *Jour. Mammal.* 15(3): 244-245. 1934.—*Thomomys bottae*, in California.

20631. JEPSEN, GLENN L. A revision of the American Apatemyidae and the description of a new genus, Sinclairella, from the White River Oligocene of South Dakota. *Proc. Amer. Phil. Soc.* 74(4): 287-305. 3 pl., 4 fig. 1934.—Apatemyidae, Plesiadapidae, and Chiromyidae have been regarded as synonymous family names for a group of American and European Paleocene and

Eocene mammals, and classified as insectivores and as primates. A reexamination of all Amer. specimens, aided by X-ray photographs furnishes criteria for the anatomic and geologic separation of one phyletic series, for which the name Apatemyidae Matthew is revived and redefined. Apatemyidae are classified as (?) Insectivora and include *Labidolemur kayi**, Bear Creek Paleocene, Montana, *L. soricoides*, Tiffany Paleocene, Colorado, *Teilhardella chardini**; Graybull Eocene, Wyoming, *Apatemys bellus**, *A. bellulus**, and *A. rodens*, Bridger Eocene, Wyoming, *Stehlinella uintensis**, Uinta Eocene, Wyoming, and **SINCLAIRELLA** (p.291), type *S.* **dakotensis*** (p.291), Chadron Formation, Oligocene, S. Dakota. *Uintasorex* Matthew and *Trogolemur* Matthew are removed from the Apatemyidae.—*G. L. Jepsen.*

20632. KURODA, NAGAMICHI. Korean mammals preserved in the collection of Marquis Yamashina. *Jour. Mammal.* 15(3): 229-239. 1934.—Tax. and distr. notes on 24 forms. Muridae: *Microtus pelliceus*, new to Korea; *Cricetulus triton nestor* Thomas (=*Asiocricetus bampensis* Kishida, *A. yamashinai* Kishida); *Mus bactrianus* **yamashinai** (p.234). Soricidae: *Crocidura dsinezumi* **quelpartis** (p.236), Quelpart I.; *C. lasiura* **thomasi** (*C. t.* Sowerby) (p.237); *C.* **yamashinai** (p.237); *C.* **neglecta** (p.238).—*F. H.*

20633. LÖNNBERG, EINAR. Prodelphinus graffmani n. sp., a new dolphin, from the Pacific coast of Mexico. *Arkiv Zool.* [*Stockholm*] 26 A(4, no. 19): 1-11. 1 pl., 1 fig. 1934.

20634. McATEE, W. L. Food habits of predatory mammals. *Jour. Mammal.* 15(3): 243-244. 1934.—Comparison of investigations by several authors in Russia and by Dearborn in Michigan. Of 9 predators in each country, at least 8 in Russia and 7 in Michigan have preponderantly beneficial food habits.

20635. MORALES AGACINO, E. Descripción de un nuevo soricido del género Crocidura Wagler, procedente de Rio de Oro. [A new Crocidura from Rio de Oro.] *Bol. Soc. Española Hist. Nat.* 34(1): 93-95. 1 fig. 1934.—*C.* **bolivari*** (p.93), key to 4 Moroccan forms of *Crocidura.*

20636. NELSON, E. W., and E. A. GOLDMAN. A new pocket mouse from Sonora. *Jour. Washington Acad. Sci.* 24(6): 267. 1934.—*Perognathus flavus* **sonoriensis,** Mexico.

20637. OEHSER, PAUL H. Another new generic name for a South American marsupial. *Jour. Mammal.* 15(3): 240. 1934.—**LESTOROS** (*Cryptolestes* Tate, preocc.).

20638. PARNELL, I. W. Some notes on the natural history of the Scottish red deer. *Proc. Roy. Phys. Soc.* [*Edinburgh*] 22(2): 75-80. 1932.—Notes on history, habitat, and biology. The average size is decreasing, owing to overstocking, to shooting of the finest stags, to absence of food and shelter, and to parasites.

20639. PASTORE, JOLE. Sui solchi cerebrali di un "Symphalangus syndactylus." *Atti R. Accad. Sci. Torino Cl. Sci. Fis. Mat. e Nat.* 68(11/15): 570-587. 3 pl. 1933.—It is concluded from a minute study of the cerebral sulci of a young *S. syndactylus* that their pattern may serve to distinguish the genus from *Hylobates.*—*From auth. summ.* (*tr.*).

20640. PETIT, G. Le genre "Lepidolemur" et sa répartition géographique. (Note préliminaire.) *Compt. Rend. Som. Séances Soc. Biogéogr.* 82. 33-37. 1933.—Recognizes in Madagascar an eastern sp., *L. mustelinus* I. Geoffroy, and a western sp., *L. ruficaudatus* A. Grand. The latter is divided into 3 sspp., including *L. r. dorsalis* Gray and *L. r. leucopus* Forsyth Major.—*F. H.*

20641. PETIT, G. Mammalia. In: Contribution à l'étude de la faune de Madagascar. III, ed. by G. PETIT. *Faune Colonies Franç.* 4(5): 559-589. 1934.—Systematic report on 16 forms, including lists of specimens and descr., tax., and life-history notes. Centetidae: *Echinops* Martin is considered a subg. of *Ericulus* Geoffroy; *Ericulus telfairi* **nigrescens** (p.570); *Limnogale mergulus* F. Major, emend. descr.—*F. H.*

20642. PRELL, H. Die gegenwärtig bekannten Arten der Gattung Chinchilla Bennett. *Zool. Anz.* 108(5/6): 97-104. 1934.—Discusses the taxonomic history of the genus. Three spp. are recognized: *C. chinchilla* (Licht.), Peru and Chile from lat. 9°-23° S., in the W. Andes; *C.* **velligera** (*C. lanigera* Bennett, preocc.) (p.100), Chile from lat. 25°-32° S., in coastal hills and inland valleys; and *C. boliviana* Brass, S. Bolivia and N. Argentina, in the E. Andes. Trade names of the various forms are supplied. Bibliography.—*F. H.*

20643. RUSCONI, CARLOS. Una nueva especie de comadreja fósil, "Didelphys seneti," n. sp. *Anales Soc. Cient. Argentina* 113(5): 213-215. 1 fig. 1932.—*D.* **seneti*** (p.213), mandible with teeth, Ensenada stage, Upper Pliocene, Argentina.

20644. ST. LEGER, J. On two "red duikers" from Mt. Elgon and Mt. Kenya, East Africa. *Ann. and Mag. Nat. Hist.* 14(81): 382-385. 1934.—*Cephalophus* **fosteri** (p.383), Mt. Elgon, 8000-11,300 ft., Uganda; *C.* **hooki** (p.384), Mt. Kenya, 8500-10,000 ft., Kenya.

20645. SANBORN, COLIN CAMPBELL. Neotropical bats in the Carnegie Museum. *Ann. Carnegie Mus.* 21(3): 171-183. 1932.—Distr. and tax. of 46 forms, chiefly from Costa Rica, Colombia, Bolivia, Venezuela, and Brazil. *Cormura brevirostris,* new to Costa Rica and Colombia; *Pteronotus suapurensis,* new to Costa Rica; *Xenoctenes hirsutus,* new to Colombia, redescr.; *Lonchorhina aurita,* new to Bolivia and Brazil; *Phyllostomus verrucosus,* new to Costa Rica; *Anoura geoffroyi,* new to Bolivia; *Enchisthenes harti,* new to Venezuela, redescr.—*F. H.*

20646. SCHLAIKJER, ERICH M. Contributions to the stratigraphy and palaeontology of the Goshen Hole Area, Wyoming. 1. A detailed study of the structure and relationships of a new zalambdodont insectivore from the middle Oligocene. *Bull. Mus. Comp. Zool.* 76(1): 1-27. 1 pl., 7 fig. 1933.—*Apternodus* **gregoryi*** (p.6), nearly complete skull and jaws. Solenodontidae, here claimed as n. subfam., but used by Gill (1872), is redefined and *Micropternodus* is assigned to it. Subfam. Apternodontinae is transferred from Tenrecidae to Solenodontidae. The relationships between *Apternodus* and other Zalambdodonta are discussed. *Arctoryctes* (Miocene) and *Necrolestes* are excluded from the suborder.—*E. P. G.*

20647. SCHWARZ, ERNST. Notes on the nomenclature and systematic position of some African mammals. *Ann. and Mag. Nat. Hist.* 14(80): 258-261. 1934.—*Simia porcaria* Brünnich is not applicable to the Chacma baboon, but is a syn. of *Macaca nemestrina* L.; *S. sphingiola* Hermann is indefinable; *Papio comatus* E. Geoffroy thus becomes available for the Chacma baboon; lectotypes are designated for *P. porcarius occidentalis* Goldblatt and *P. p. orientalis* Goldblatt, both of which are placed in syn. of *P. c. comatus* E. Geoffroy; *P. c. griseipes* Pocock (=[*Choiropithecus porcarius*] *transvaalensis* Zukowsky, [*Choiropithecus*] *rhodesiae* Haagner; *P. cynocephalus jubilaeus* Schwarz); *Civettictis civetta schwarzi* Cabrera, type locality restricted to Zanzibar; the author of *Hippopotamus capensis* proves to be Desmoulins, 1825.—*F. H.*

20651. STRAUS, WILLIAM L. Jr., and GEORGE B. WISLOCKI. On certain similarities between sloths and slow lemurs. *Bull. Mus. Comp. Zool.* 74 (3) : 43-56. 1932. —It is obvious that the sloths and lorises exhibit marked similarities in certain morphological characters. These similarities are apparently correlated with functional similarities of the parts involved. They are by no means indicative of any close genetic relationship of the 2 groups, but may be regarded as adaptive convergences. The sloths are highly and peculiarly specialized members of the Xenarthra, while the slow lemurs occupy a similar position among the Lemuroidea. Both groups have secondarily become adapted to a sluggish mode of arboreal life, and to the maintenance of clinging postures. Therein seems to lie the answer to the convergent structural adaptations. These structural similarities, which we interpret as convergences, involve the presence in the extremities of a peculiar and highly specialized type of blood vascular distr. (the bundle form of rete mirabile) ; increase in relative length of the upper extremity; reduction of the tail; relative broadening of the chest; increase in number of presacral vertebrae and ribs; absence (except in *Loris tardigradus*) of an anticlinal vertebra; and blunting of thoraco-lumbar and lengthening of cervical spinous processes. Bibliography.—*Auth. concl.*

INTRODUCTORY GUIDE TO THE INDEXES

Users of Biological Abstracts are reminded that this volume covers only a part of the literature published in the period during which the volume was issued. Succeeding volumes must therefore also be consulted for literature more or less contemporaneous with that reported and indexed in this volume.

SUBJECT AND SYSTEMATIC INDEXES

GENERAL

These indexes are designed to meet the needs both of those whose interests lie chiefly in systematic groups of organisms and of those whose interests are not circumscribed in this way. For the former, chiefly systematic biologists, one of the requisite avenues of approach to their subject is by systematic groups; this is provided by the systematic index. Experience has shown that the needs of those concerned with other biological disciplines are most practically met by a detailed analytical subject index alphabetically arranged; an extensive index of this type is therefore provided.

A special effort has been made to design these two indexes as far as possible in such a way that they will complement rather than duplicate each other. Certain departures from standard indexes will therefore be noted. Chief among these is the policy in the systematic index to carry the indexing only to genera, not to species; the detailed indexing of species, including new ones, occurs under genera in the subject index only. This decision is prompted by the fact that an increasing number of investigators have frequent occasion to locate information concerning species of plants or animals without necessarily knowing their precise systematic position in the classification used.

This arrangement will be convenient for systematists as well, especially when seeking information concerning a limited number of given genera; under these circumstances the subject index will be found the more satisfactory, making consultation of the systematic index in such cases unnecessary. When, however, more comprehensive and extended systematic orientation is desired, the systematic index provides a complete condensed approach by groups and their subgroups down to and including genera.

THE SUBJECT INDEX

(p. 2489 to end)

This index is based upon an analysis of the abstract, not merely the title.

The words, terms, and expressions currently used for the same or closely related subjects vary greatly. If the indexing is done according to the particular words used by authors, much scattering of material concerning the same subject obviously results. Therefore the effort has been to index subjects and not merely words, and, where necessary, provide cross references which will lead the user from words commonly used to the rubrics under which the pertinent material has been assembled. Thus, studies on blood sugar are indexed under that rubric, not under "Hypoglycemia," "Hyperglycemia," or other terms used by authors to denote variations in blood sugar; because of their frequent use, however, "Hypoglycemia," "Hyperglycemia," etc., are entered in their respective alphabetic positions with cross references to "Blood sugar." Similarly, word indexing frequently scatters material referring to the same species; thus, material concerning the domestic fowl would appear under such diverse rubrics as hen, cock, pullet, capon, fowl, chicken, chick, etc.

While an effort has been made through subject indexing to avoid in a large measure the scattering resulting from word indexing, the index is, in the main, not a classified one. Since ease of use rather than strict logic is demanded of an index, the indexing so far as possible is done under the rubrics under which it is thought the majority of users are most likely to search. To this extent the index is frankly opportunistic. Thus the index contains rubrics for "Antibodies," "Antigens," "Complement," "Toxins," "Vaccines," etc., instead of relegating all to subordinate positions under some general rubric, *e.g.*, "Immunity." Since individual researches tend to be highly specialized, this general policy is believed to result usually in greater convenience to investigators.

This policy necessarily places closely related subjects in more or less widely separated alphabetical positions, and since the index should be useful not only to the specialist but also to those who wish a more comprehensive orientation in a wider field, cross references have been liberally employed to lead users to related material. Also, when the nature of the material has made it possible, the information has not only been entered under, for instance, the specific name of the substance, but has been listed again under the class or group to which it belongs. For example, the papers which deal with cyanides as insecticides appear with detailed entries under "Cyanides," as: "Cyanides, as insecticides, in wireworm control, ... 14089," and are listed again, by number only, under "Insecticides," as: "Insecticides, cyanides as, ... 9202, 14098." Similarly, papers on specific stains are entered in detail under the name of the stain, *e.g.*, "methylene blue," etc., and listed again by number only under "Stains." Cyanides and methylene blue cannot, however, be made exclusively subrubrics of "Insecticides" and "Stains," respectively, because of their importance in other directions.

There are some cases, however, in which there seems to be no necessity for thus scattering related material, especially in cases where there is an anatomical basis for grouping, material has been entered only under the larger group heading. Thus the bones, muscles, nerves, and the various parts of the brain are listed under "Bone," "Muscle," "Nerve," "Brain," rather than under "Ulna," "Sartorius," "Phrenic," "Amygdala," "Restiform body," etc.

Under very broad rubrics only those papers are in general indexed which themselves are broad in content or point of view. Thus, under "Physiology," "Pathology," "Cytology," "Horticulture," "Ecology," etc., will usually be found indexed only books or other general treatments; to do otherwise would make these headings unwieldy and more or less coextensive with the corresponding abstract sections.

Indexing under names of organisms

In general, indexing is done under the scientific name used in the original; *i.e.*, no attempt is made to select the name that might be considered correct under the rules where two or more names are in current use. This results in some scattering of references pertaining to the

same organism, notably among bacteria, where several systems of nomenclature are current. However, specialists will know what names to consult in such cases; also, a limited amount of cross referencing is provided.

When common names only are used in the original, the indexing as a rule is done under these; allocation to genera would in many cases be difficult and introduce errors. Thus, if merely "clover" appears in the original, it is indexed under that name rather than under the genus *Trifolium,* since the plant in question may belong to some other of the several genera members of which are known as "Clovers." Where, however, there is no room for doubt as to the proper scientific name of an organism or group mentioned only by common name in the original, indexing may be done under the scientific name. Between common names and their possible, probable, or certain corresponding generic names, cross references have been provided in a limited number of cases.

Since the same generic name is sometimes used for both plants and animals, the alphabetical arrangement used in the subject index throws these together. In most cases these have been separated. Occasionally, however, the species listed under a generic name will be in part animal and in part plant; reference to the corresponding abstracts at once distinguishes between them.

Studies, especially experimental, on common laboratory animals (guinea pig, mouse, rat, rabbit, dog, cat, etc.) are in general not indexed under the name of the animal; the same applies to man, especially in the fields of physiology, pathology, and anatomy.

In view of the extensive systematic index, the indexing in the subject index is usually not done under group names above the rank of genus. Occasionally it appears desirable to insert references under larger group names, often in anglicized form, *e.g.,* "Diatoms," "Fishes," etc. However, every supergeneric group recognized and represented in the systematic index appears in the subject index in Roman type; the page number following refers to the page of the systematic index on which the group is treated, and the exponential figure attached to the page number refers to the column.

Similarly, the page and column references appearing after generic names refer to the exact places in the systematic index where these genera are treated systematically. *It is thus possible to determine instantly the classification of any genus occurring in the alphabetical subject index which appears also in the systematic index.* For example, the genus *Anopheles* in the alphabetic subject index is followed by "(p. 2445 ^{4})"; reference to this page and column in the systematic index discloses that the genus falls in the family Culicidae, order Diptera, class Insecta.

Through the policies outlined in the two paragraphs preceding it is apparent that *the subject index provides at the same time a complete alphabetical index to the systematic index.* It is thus possible for users of the alphabetical subject index to orient themselves systematically as to both genera and supergeneric groups, thereby facilitating the utilization of systematic information—especially by those who find it difficult to do so when only a systematic approach is available. Furthermore, the user is at once put in touch with related genera and groups and the information recorded concerning them, thereby simplifying the problem of approaching a special problem against a background of broad orientation.

Typography

All generic names are in *italic type* (the only exceptions are new genera and subgenera, which appear in bold-faced capitals); all other first words in rubrics are in ordinary Roman type. This will be found convenient: if the search is for a generic name, all roman type rubrics can be ignored; if the search is for any other subject rubric, all italic names can be passed by automatically.

New genera and subgenera are printed in bold-faced capitals, *e.g.,* **APODICRANIA.** Categories below the rank of genus are not indexed in first position, the sole exception being new subgenera.

New species, varieties, etc., appear in lower-case bold-faced type, *e.g., Anopheles* **demeilloni,** *Carex sempervirens* v. **bulgarica.**

New specific, varietal, etc., names proposed to replace preoccupied names are printed in lower-case bold-faced type, with the replaced combination following in parentheses and in italic; *e.g., Asphragis* **dubiosa** (*A. aciculata*). If the preoccupation is the result of transferring a species from one genus to another, thus involving two generic names, the replaced binomial is also entered in first position, in italic, followed in parentheses by the new binomial (the new name appearing in lower-case boldface); *e.g., Canthocamptus crassus* (*Attheyella* **ekmani**).

In *new combinations* (*e.g.,* transfers of members from one genus to another), the specific name appears in lower-case bold-faced type, followed in parentheses and in italic by the genus from which the member is transferred; *e.g., Brillia* **par** (*Orthocladius*). The old combination is also entered in first position, but wholly in italic, followed in parentheses and in italic by the genus to which the transfer is made: *Orthocladius par* (*Brillia*). If in making the transfer any change in specific, varietal, etc., names is made, the full combinations are given.

In the abstracts *new synonyms* are preceded by an equality sign and placed in parentheses; the name under which the synonym is sunk precedes, *e.g., Coragyps a. atratus* (Bech.) (=*Cathartes foetens* Licht.).

A dagger (†) associated with a plant or animal name indicates that it is a *fossil.* The abbreviations in parentheses signify *geological periods,* as follows:

(Cb)	= Carboniferous	(N)	= Neogene
(Cm)	= Cambrian	(O)	= Ordovician
(D)	= Devonian	(Pl)	= Pleistocene
(E)	= Eogene	(Pr)	= Permian
(J)	= Jurassic	(S)	= Silurian
(K)	= Cretaceous	(Tr)	= Triassic

Some necessary variations from the above will be self-explanatory.

In the abstracts an asterisk (*) attached to a name indicates that the form is illustrated.

THE SYSTEMATIC INDEX

(pp. 2385-2466)

The indexing in the systematic index is limited to those disciplines in which the interest is more or less strongly by systematic groups, notably the taxonomic and morphological. Aside from the strictly taxonomic, which will be discussed in more detail below, the indexing is confined at present to the following subjects, the references being grouped correspondingly under the abbreviations given in parentheses:

Morphology, including anatomy (MORPH.)
Histology (HIST.)
Cytology (CYT.)
Embryology (EMB.)
Life history (L. H.)
Phylogeny (PHYL.)
Geographical distribution (DIST.)
Bibliography (BIBL.)

In indexing specific and subspecific taxonomic entities proposed as new to science, all categories are provided for, of which the more common are the following:

New species (N. SP.)
New subspecies (N. SSP.)
New varieties (N. VAR.)
New forms (N. F.)
New aberrations (N. AB.)

If entities of two or more kinds (*e.g.,* new species and new varieties) are proposed in the same paper, the paper is entered only under the superior category (N. SP.).

Superspecific entities (subgenera, genera, and higher groups) proposed as new to science are listed by name

in bold-faced capitals, *e.g.*, **CHILOCYSTIS.** New genera appear in alphabetic order among the other genera of the particular group; new subgenera are indented under the corresponding genera; in new supergeneric groups the exact position of the names varies somewhat, depending upon the rank of the group and whether the name is merely indexed or whether utilized by the editor for arranging subordinate groups under it. All new superspecific group names, except genera, are accompanied by a statement of the rank assigned to them by the authors, *e.g.*, n. subg., n. ord., etc.

In new transfers of members from one genus to another (*new combinations*),[1] an index entry is provided, under the genus to which the transfer is made, in the category **N. COMB.**; an entry is also provided under the genus from which the transfer is made—usually the genus in which the transferred member was originally placed—in the category "synonymy" **(SYN.)**.

New names proposed to replace preoccupied ones are referred to under the genus in the category **N. N.**

New synonymy,[1] *i.e.*, the proposal to unite two or more generic, specific, or subspecific concepts previously considered distinct, is referred to, under the genus or genera involved, in the category **SYN.**

Taxonomic information other than that discussed above, *e.g.*, keys, revisions, synopses, emended descriptions, etc., is entered in the category "taxonomy" **(TAX.)**; this is not done, however, for genera to which the same abstract reference has already been made in one of the above categories, *e.g.*, **N. SP., N. VAR., N. COMB.**

Certain *fossil genera* of very doubtful position, or form genera of broad scope, are omitted from the systematic index; they are, however, included in the subject index.

Geographical distribution **(DIST.)** is in general entered in the systematic index only when treated more or less comprehensively or when data of apparently peculiar interest are presented. Some variation in this policy will be noted. Geographical distribution is, however, indexed fully by groups under geographical and political units in the Geographical Index (see below). This, it is believed, will be found useful because the interest in much recorded distributional information is local. However, by consulting the Geographical Index the student desiring more exhaustive information regarding distribution will be able to assemble easily the desired references.

Papers treating a group (family, order, etc.) more or less comprehensively from some point of view (morphology, taxonomy, cytology, etc.) are frequently indexed under the broader group, though they may also be entered under individual genera. However, new species, new varieties, new combinations, etc., are invariably referred to under the genera.

Genera are arranged alphabetically under groups, and are therefore easily located. If, on the other hand, the systematic index is consulted for subjects—cytology, embryology, life history, etc.,—the distinctive type used for the abbreviations renders the assembling of references from this point of view almost equally simple.

The *systems of classification* used in the various groups are determined by the editors in charge of the respective sections. In general the policy is to use conservative modern classifications; also, to omit intermediate groups, especially subfamilies (a few large families in Lepidoptera being the only exceptions). Since the purpose of the systems here used is chiefly to facilitate the location of desired information, it is believed that the omission of these taxonomic refinements will contribute to, rather than detract from, the utility of the index; furthermore, these refinements are more likely to be fluctuating and controversial, involving changes in successive volumes confusing to the user of the indexes.

GEOGRAPHICAL AND GEOLOGICAL INDEXES

THE GEOGRAPHICAL INDEX

(pp. 2467-2485)

This index is devoted to the indexing of geographical information, particularly the geographical distribution of organisms.

The various geographical areas adopted as units for indexing purposes are grouped under the following major headings: North America, South America, Europe, Africa, Asia, Malay Archipelago, Australasia, Antarctica, Oceanic Islands, and Oceans. The arrangement of the areas under each of these major headings is alphabetical except in the case of North America, where the countries are arranged in a general north-to-south sequence. The subdivisions of any country, such as the provinces of Canada or the separate states of the United States, are arranged alphabetically under that country.

Under each geographical area or unit, organisms are listed by group names arranged alphabetically and corresponding approximately to the systematic sections of current abstract issues; *e.g.*, "Coleoptera," "Fungi," "Mammalia," etc. Items of information pertaining to geographical distribution, but not readily classifiable by systematic groups, are entered in the index above the systematic group names.

A limited amount of indexing is done under the larger geographical units (*e.g.*, West Indies; Europe; Africa, northern), either because the papers in question treat the area more or less comprehensively or because the locality data are not sufficiently specific in the original to permit of more circumscribed allocation.

The names of all geographical areas or units adopted for indexing purposes are printed in their proper places in this index. A few, however, are followed by no abstract numbers; this indicates that the current volume contains no material for indexing under those names.

For indexing purposes, it is a general policy to include coastal islands with near-by mainland countries rather than with oceanic island groups. Likewise coastal waters, up to the 100-fathom line, are generally included with the adjoining mainland. Oceans include adjoining gulfs, bays, and smaller seas. For the most part, only aquatic organisms are indexed under oceans. For abstracts dealing with organisms of a certain kind of distribution, such as coastal fishes (Pisces) or pelagic birds (Aves), references may be given both under an ocean and under a land area.

A dagger (†) preceding an abstract number indicates that the abstract deals with a fossil organism or organisms. Various letter symbols in parentheses signify *geological periods*, as follows:

(Cb)	= Carboniferous	(N)	= Neogene
(Cm)	= Cambrian	(O)	= Ordovician
(D)	= Devonian	(Pl)	= Pleistocene
(E)	= Eogene	(Pr)	= Permian
(J)	= Jurassic	(S)	= Silurian
(K)	= Cretaceous	(Tr)	= Triassic

Additional information on the distribution of organisms, as far as it pertains to the geologic occurrence

[1] It is the policy to list new combinations in the abstracts provided (1) they are labeled as new (done usually only in plant taxonomy) or (2) text statements make it clear that they are proposed as new. The same policy in general applies to new synonyms, where specific labeling of new synonyms is very rarely done by workers in either kingdom. This policy obviously results in very incomplete recording and indexing of new combinations and new synonyms; however, it results in indexing those which authors record with sufficient clearness.

of fossil species, is indexed in the Geological Index under the names of the geological periods, on pages 2487-2488.

Abstract numbers in bold-faced type indicate that new taxonomic concepts (e.g., new species or subspecies) are proposed in the papers referred to.

THE GEOLOGICAL INDEX TO PALEONTOLOGICAL MATERIAL
(pp. 2487-2488)

This index is devoted to the indexing of paleontological information on the basis of the geological time scale. The sequence progresses from older to younger strata by eras and periods. Under each period organisms are listed by group names arranged alphabetically and corresponding approximately to the systematic sections of current abstract issues, *e.g.*, "Crustacea," "Gymnospermae," "Mammalia," etc.; the only important exception is represented by "Insecta," the orders of which are not separated. For a detailed systematic approach to paleontological material the Systematic Index (pp. 2385-2466) should be consulted.

A limited amount of indexing is done under the eras, either because the papers in question are more or less comprehensive or because the geological data are not sufficiently specific in the original to permit of allocation to periods.

In general, geographical locations are not included; for a geographical approach to paleontological material, the Geographical Index (pp. 2467-2485) should be consulted.

For an alphabetical approach to fossil forms, the Subject Index (p. 2489 to end) should be consulted.

Abstract numbers in bold-faced type indicate that new taxonomic concepts (e.g., species or subspecies) are proposed in the papers referred to.

Synedra, N. SP., 16694; N. F., 16682
Synedrosphenia, N. COMB., 16694
Tabellaria, N. VAR., 16682
Tetracyclus, N. COMB., 16694
Thalassiothrix, N. SP., 12267

EUNOTIACEAE
Eunotia, N. SP., 12267, 16682, 16694, 19518; N. VAR., 14547; N. F., 3577

ACHNANTHACEAE
Achnanthes, N. SP., 3577, 14547, 16682, 16694; N. VAR., 12267, 16682, 16693
Cocconeis, N. SP., 12267, 16694; N. VAR., 19519
Eucocconeis, N. SP., 16696; SYN., 16694
Microneis, N. SP., 12267

NAVICULACEAE
Amphipleura, N. VAR., 19518
Amphora, N. SP., 3577; N. VAR., 12267, 16682
Anomoeoneis, N. VAR., 16697
Caloneis, N. SP., 14547; N. VAR., 16696; N. F., 16682
Cymbella, N. SP., 3577, 12267, 16682; N. F., 16693; CYT., 6485
Diploneis, N. SP., 14547, 19518; N. VAR., 16682
Encyonema, N. SP., 19518
Frustulia, N. SP., 16696; N. VAR., 12267
Gomphonema, N. SP., 12267, 16682, 19518; N. VAR., 12267; SYN., 16694
Gyrosigma, N. VAR., 12267
Mastogloia, N. SP., 12267, 16694
Navicula, N. SP., 3577, 7869, 12267, 14547, 16682, (N) 16690, 16693, 19518; N. VAR., 12267, 16682, 16696, 16697; SYN., 16694
Neidium, N. SP., 3577, 16682; N. VAR., 16696, 16697
Pinnularia, N. SP., 3577, 7869, 12267, 12268, 14547, 19518; N. VAR., 16682
Pleurosigma, N. SP., 12267
Pseudoamphiprora, N. SP., 12267
Rouxia, N. SP., (†) 5714; N. COMB., 5714
Stauroneis, N. SP., 14547, 19518; N. VAR., 12267, 16682; N. F., 3577, 16696
Stigmaphora, SYN., 16694
Trachyneis, N. VAR., 12267
Tropidoneis, N. SP., (N) 16690

EPITHEMIACEAE
Denticula, N. SP., 12267, 19518
Epithemia, N. VAR., 12267, 16682
Rhopalodia, N. VAR., 16682

NITZSCHIACEAE
Campylodiscus, N. SP., 12267; N. VAR., 12268
Cymatopleura, N. F., 16682
Gomphonitzschia, N. SP., 12267
Hantzschia, N. VAR., 19518
Nitzschia, N. SP., 12267, 16682; N. VAR., 14547, 16697; N. F., 1479; CYT., 7863; L. H., 7871
Nitzschiella, N. VAR., 19518
Perrya, N. SP., (N) 16690
Podocystis, N. F., 12267
Surirella, N. SP., 12267, (N) 16690; N. VAR., 12268

INCERTAE SEDIS
(In Bacillariophyta)
Disconeis, N. SP., 12267
GOMPHOCALONEIS, 12267; N. SP., 12267
HUSTEDTIA, 12267; N. SP., 12267

PHAEOPHYCEAE

L. H., 373, 374; PHYL., 5718

PHAEOSPORALES

ECTOCARPACEAE
Ectocarpus, N. SP., 19515; TAX., 3586, 7865; MORPH., 3586; CYT., 12274, 19527; L. H., 3586, 12274, 19521, 19527
Pylaiella, CYT., 12252; L. H., 12252
Streblonema, N. SP., 3587; DIST., 7864

TILOPTERIDACEAE
Haplospora, CYT., 12252; L. H., 12252
MASONOPHYCUS, 3587; N.SP., 3587
Tilopteris, L. H., 12252; DIST., 1474

SPHACELARIACEAE
Chaetopteris, L. H., 1482
Cladostephus, L. H., 1482
Sphacelaria, N. SP., 3587, 5716; DIST., 1474

MYRIOTRICHIACEAE
Myriotrichia, SYN., 1481; L. H., 1481
PROTASPEROCOCCUS, 1481; N. COMB., 1481

ASPEROCOCCACEAE
Lithosiphon, MORPH., 3586; L. H., 3586
Punctaria, TAX., 3586; MORPH., 3586; L. H., 3586
Scytosiphon, DIST., 7864

CHORDARIACEAE
Leathesia, L. H., 12252
Myrionema, N. SP., 3586; L. H., 3586; DIST., 7864
Nemacystus, L. H., 12262

DESMARESTIACEAE
TAX., 16705; L. H., 16705
Desmarestia, TAX., 16705; L. H., 16705

LITHODERMATACEAE
Heribaudiella, MORPH., 1466; DIST., 1466

CYCLOSPORALES

DICTYOTACEAE
Dictyota, N. SP., 3587; MORPH., 5726; HIST., 367
Padina, MORPH., 5726
Taonia, L. H., 7870

LAMINARIACEAE
Chorda, TAX., 7864
Eisenia, N. SP., 3587
Laminaria, N.SP., 5715; N.COMB., 10042; TAX., 7860; HIST., 12270; DIST., 7860
Pleuropterum, N. VAR., 5715

FUCACEAE
ACYSTIS, 7865; N. SP., 7865
Ascophyllum, HIST., 12270
Fucus, N. COMB., 7854; MORPH., 5718; HIST., 12270; EMB., 5718
Pelvetia, HIST., 12270
Sargassum, N. SP., 7865, 12278; TAX., 3581

RHODOPHYCEAE

TAX., 3578; L. H., 373, 374

BANGIOIDEAE

BANGIALES

BANGIACEAE
Asterocystis, DIST., 7864
Erythrocladia, N. SP., 7852
Porphyridium, N. SP., 1467

FLORIDEAE

NEMALIONALES

NEMALIONACEAE
Acrochaetium, N. SP., 1463, 16681

HELMINTHOCLADIACEAE
Liagora, SYN., 3575
Trichogloea, N. SP., 3574

LEMANEACEAE
Lemanea, DIST., 10035

CHAETANGIACEAE
Galaxaura, SYN., 3575

GIGARTINALES
TAX., 1480, 3578; MORPH., 1480, 3578; L. H., 1480; DIST., 1480

ACROTYLACEAE
Acrotylus, TAX., 3578
Hennedya, TAX., 3578

GELIDIACEAE
Echinocaulon, N. SP., 14539
Gelidium, N. SP., 3587, 16701; TAX., 14539
Pterocladia, N. SP., 16701
Wrangelia, TAX., 12272

GIGARTINACEAE
Actinococcus, SYN., 7851; MORPH., 14536; L. H., 3571, 12257, 14536
Ahnfeltia, TAX., 1480; L. H., 1480

MYCOTYPHA, 5734; N. SP., 5734
Pilaira, TAX., 10048
Piloboles, N. SP., 10048

EMPUSACEAE
Entomophthora, L. H., 18966

ASCOIDEACEAE
Pericystis, CYT., 19556; L. H., 19556; PHYL., 19556

OOMYCETES

SAPROLEGNIACEAE
Achlya, N. VAR., 19535
Araiospora, N. SP., 1498; L. H., 1498; MORPH., 1498
Leptolegnia, CYT., 19541; L. H., 19541
Leptomitus, TAX., 7879; L. H., 19523
Rhipidium, N. VAR., 19535
Saprolegnia, CYT., 2226; L. H., 19557

ANCYLISTACEAE
Myzocytium, L. H., TAX., 1512

PERONOSPORACEAE
Albugo, MORPH., 10053; L. H., 10053
Cystopus, N. F., 1509, 1510
Nematosporangium, TAX., 4555
Peronospora, N. SP., 1509, 1510, 19533; L. H., 236, 4547
Phytophthora, TAX., 3594; MORPH., 4648, 17757; DIST., 13239
Plasmopara, N. SP., 1510; L. H., 2413
Pythiomorpha, N. SP., 4548
Pythium, N. SP., 16713; TAX., 4555; MORPH., 4555

INCERTAE SEDIS
(In Phycomycetes)
Eccrinopsis, N. SP., 5748
Trichella, N. SP., 5748

ASCOMYCETES

CYT., 19556; L. H., 19556; PHYL., 19556
ASPERGILLALES, n. n. for *Plectascales*, 19529

LABOULBENIALES
TAX., 19532; MORPH., 19532; CYT., 19532; BIBL., 19532

GYMNASCALES

ENDOMYCETACEAE
Byssochlamys, N. SP., 7880
Endomyces, N. VAR., 14279; N. COMB., 1503; CYT., 2226; L. H., 1503

SACCHAROMYCETACEAE
Saccharomyces, N. VAR., 19240; TAX., 7881
Zygosaccharomyces, N. SP., 19240

GYMNASCACEAE
Ctenomyces, SYN., 7882

PERISPORIALES

ERYSIPHACEAE
Erysiphe, DIST., 214
Microsphaera, L. H., 1508
Sphaerotheca, L. H., 16715

PERISPORIACEAE
Chaetostigmella, N. SP., 7887
Irenina, N. SP., 7887
Meliolina, N. SP., 7887

SPHAERIALES

SPHAERIACEAE
Anthostomella, N. SP., 1498
Calospora, N. SP., 5738
Ceratostomella, MORPH., 10955; L. H., 10051
Chaetomium, L. H., 1484
Chaetoplea, TAX., 14562
COCHLIOBOLUS, 14562; N. COMB., 14562
Diaporthe, N. SP., 1493; TAX., 4559
Didymella, N. SP., 235
Didymosphaeria, N. SP., 1493, 19533
DIDYMOSPHAERITES, (†) 3724; N. SP., (E) 3724
Fimetaria, L. H., 1484
Gnomonia, N. COMB., 19531; L. H., 19531

Venturia, N. SP., 2412

HYPOCREACEAE
Epichloe, L. H., 4562
Gibberella, N. COMB., 8865
Megalonectria, N. COMB., 17778; L. H., 17778
Nectria, TAX., 4542
Neurospora, TAX., 19550; CYT., 4367, 4388; L. H., 102, 1504, 1505, 4367, 14557; DIST., 19550
Podocrea, SYN., 19546

LOPHIOSTOMACEAE
Lophiosphaera, N. COMB., 14564; L. H., 14564; PHYL., 14564
Lophiotrema, N. SP., 2412

CYTTARIACEAE
TAX., 19546
Cyttaria, N. SP., 19546

VERRUCARIACEAE
Anthracothecium, N. SP., 3609
Astrothelium, N. SP., 7892
Dermatocarpon, N. SP., 10057, 12310
Endocarpum, N. SP., 3609
Microthelia, N. SP., 3609
Pleurotheliopsis, N. SP., 3609
Polyblastiopsis, N. SP., 3609
Porina, N. SP., 3609, 7892
Pseudopyrenula, N. SP., 3609
Pyrenula, N. SP., 3609, 7892
Thelidium, N. SP., 3605
Thrombium, N. SP., 3608
Trypethelium, N. SP., 3609
Verrucaria, N. SP., 3605, 3609; N. VAR., 3603

DOTHIDEALES

DOTHIDEACEAE
Achorella, MORPH., 1488
Amerodothis, MORPH., 1488
Auerswaldia, MORPH., 1488
Bagnisiopsis, MORPH., 1488
Catacauma, N. SP., 7887
Dibotryon, L. H., 6548
Dothidea, MORPH., 1488
Dothidella, MORPH., 1488
Dothidina, TAX., 1488
Ophiodothella, N. SP., 7887
Systremma, MORPH., 1488
Uleodothis, MORPH., 1488

MYCOPORACEAE
Mycoporellum, N. SP., 3609

MICROTHYRIALES

POLYSTOMELLACEAE
Diplocarpum, MORPH., 4588
Stigmatea, N. SP., 19533

MICROTHYRIACEAE
Calopeltis, N. SP., 7887
Echinodella, N. SP., 7887
Microthyrium, N. SP., 1493
Seynesia, N. SP., 7887

MICROPELTACEAE
Clypeolum, N. SP., 7887
Dictyothyrium, N. SP., 7887
Microthyriella, TAX., 19555
Phragmothyriella, N. SP., 19555

PHACIDIALES

HYSTERIACEAE
Glonium, SYN., 14564; L. H., 14564; PHYL., 14564
Hysterographium, N. SP., 2417
Lophodermium, N. VAR., 16721
Mytilidion, N. SP., 5744
LOPHIOPSIS, N. SUBG., 5744

GRAPHIDACEAE
Arthonia, N. SP., 3605, 3609
Arthothelium, N. VAR., 7891
Chiodectum, N. SP., 3609, 7892; N. F., 3603
Graphina, N. SP., 3609, 7891, 7892
Graphis, N. SP., 3609
Opegrapha, N. SP., 3605; SYN., 16724
Phaeographina, N. SP., 7891
Phaeographis, N. SP., 3609, 7891
ROCCELLODEA, 12304; N. SP., 12304
Sarcographa, N. SP., 3609
Sclerophytum, N. SP., 3609

TRYBLIDIACEAE
Odontotrema, TAX., 19548

PEZIZALES
MORPH., 10048; L. H., 10048

DERMATEACEAE
Crumenula, TAX., 19548
Dermatea, N. SP., 16721; SYN., 5750; L. H., 1490
Godronia, N. SP., 5750
Pezicula, N. SP., 19548

BULGARIACEAE
Bulgaria, SYN., 12284
CALLORITES, (†) 3724; N.SP., (E) 3724
Sarcosoma, N. COMB., 12284
Stamnaria, TAX., 5750

PATELLARIACEAE
Bactrospora, SYN., 16724
Tryblidaria, N. SP., 19548

CALICIACEAE
Calicium, N. VAR., 3607
Sphaerophorus, N. SSP., 3609
Tylophorum, N. SSP., 3609

COLLEMACEAE
Collema, N. SP., 3602, 3609; CYT., 5747
Dicollema, TAX., 3602

SALICACEAE

TAX., 19620
Populus, N. SP., (K) 14664; N. F., 3650; N. COMB., 3650; N. HYBR., 3650; TAX., 6525, 14502; HIST., 5851, (N) 5862, 12324, 12386
Salix, N. SP., 5822, 19620, 19661; N. VAR., 10087; MORPH., 17638; HIST., (N) 5862, 12324; CYT., 6525, 13051; DIST., 3691
Toisusu, N. COMB., 19620

MYRICALES

MYRICACEAE

MORPH., 14626; PHYL., 14626; DIST., 167
Myrica, N. SP., 7979, 10122; SYN., 5808, 19636

BALANOPSIDALES

BALANOPSIDACEAE

Balanops, N. SP., 19579
Trilocularia, N. SP., 3684

JUGLANDALES

JUGLANDACEAE

MORPH., 14626; PHYL., 14626
Carya, HIST., 14624; EMB., 7990
Engelhardtia, N. SP., 14584
Hicoria, HIST., 19480; CYT., 8714
Juglans, N. VAR., 3686; HIST., 5851; EMB., 7990; L. H., 19479

FAGALES

BETULACEAE

Alnus, N. F., 19620; HIST., (N) 5862
Betula, N. SP., 5788; N. F., 19620; TAX., 19572; DIST., 8838
Carpinus, N. SP., 10133; TAX., 19572
Corylus, N. COMB., 19620; HIST., (N) 5862
Ostrya, N. VAR., 1574; MORPH., 12246

FAGACEAE

Castanea, N. VAR., 3686; HIST., (N) 5862
Castanopsis, N. SP., 3637, 7917; SYN., 19635
Fagozylon, DIST., (Ter) 1601
Fagus, N. VAR., 7911; MORPH., 5851; HIST., (N) 5862, 12347; L. H., 10890; DIST., 4522, 10025, 12233
Lithocarpus, N. SP., 5776, 5777; SYN., 19585
Nothofagus, HIST., 12359; DIST., 17737
Pasania, SYN., 3686
Pasaniopsis, N. VAR., 3686; *Shiia* n. n. for, 3686; N. COMB., 3686
Quercus, N. SP., 3686, 5775, 5777, 14584, 14587, 19624; N. COMB., 19585; MORPH., 7983, 7984, 14506; HIST., (N) 5862, 12324; CYT., 8714; EMB., 12391; L. H., 4524; SYN., 3637, 5809
SHIIA, n. n. for *Pasaniopsis*, 3686; N. COMB., 3686

URTICALES

CYT., 34

ULMACEAE

Aphananthe, SYN., 3690
Celtis, N. SP., 7979; HIST., 5851
Gironniera, SYN., 3690
Pteroceltis, N. VAR., 1557
Trema, N. SP., 14584
Ulmus, TAX., 16782; HIST., 5851, 7991; CYT., 34, 36; DIST., 3553, 16618
Zelkowa, N. VAR., 1557; DIST., (†) 19676

MORACEAE

TAX., 5855; MORPH., 5855
Artocarpus, CYT., 34
Brosimopsis, N. SP., 1554
Cannabis, CYT., 22, 41; HIST., 12347
Cecropia, CYT., 34
Chlorophora, HIST., 14617
Covellia, SYN., 3684
Dorstenia, N. SP., 7979, 14585; TAX., 34; CYT., 34
Ficonium, N. SP., (Ter) 8003
Ficus, N. SP., 3684, 7917, 14584, (E) 14663, 19579; N. VAR., 7979; SYN., 19635; MORPH., 5839; CYT., 34, 5839; EMB., 5839; PHYL., 5654; DIST., 5654

Nivenia, SYN., 10072
Paranomus, TAX., 10072
Proteaephyllum, N. SP., (Mes) 8001
Rhopala, N. SP., 1572

SANTALALES

LORANTHACEAE

Elytranthe, N. SP., 3684
Gaiadendron, N. SP., 7957
Loranthus, N. SP., 1569, 3684, 7979, 14583, 14584, 19623; DIST., 7915
Phrygilanthus, N. SP., 7957
Psittacanthus, N. SP., 19640
Viscum, N. SP., 7979; MORPH., 178

SANTALACEAE

Osyris, N. SP., 7979
Santalum, N. SP., 5752
Thesium, N. SP., 7979, 16758

OPILIACEAE

Opilia, N. SP., 7979

OLACACEAE

Anacolosa, N. SP., 19650
Ptychopetalum, N. SP., 1448

ARISTOLOCHIALES

ARISTOLOCHIACEAE

Aristolochia, N. SP., 7979, 10115
Asarum, N. SP., 7916; N. VAR., 19587

MITRASTEMONACEAE

Mitrastemon, N. COMB., 3686

HYDNORACEAE

Hydnora, N. SP., 7979

POLYGONALES

POLYGONACEAE

MORPH., 12373
Acanthogonum, N. COMB., 1556
Calligonum, N. SP., 7967
Centrostegia, N. COMB., 1556
Chorizanthe, N. SP., 1556
Coccoloba, N. SP., 14611
ERIOGONELLA, 1556; N. COMB., 1556
Eriogonum, N. SP., 1570, 3673; N. VAR., 19578
Fagopyrum, N. COMB., 19620
Lastarriaea, SYN., 1556
Mucronea, N. COMB., 1556
Oxygonum, N. SP., 7979, 10121
Oxytheca, N. COMB., 1556
Persicaria, N. COMB., 19620
Polygonum, N. SP., 3686, 7920, 7979; N. VAR., 3636; TAX., 3636; SYN., 19620; DIST., 3691
Rumex, N. SP., 7979, 19634; N. SSP., 10129; N.VAR., 10090, 19587

CHENOPODIALES (CENTROSPERMAE)

CHENOPODIACEAE

Atriplex, MORPH., 175; L. H., 175
Bassia, N. SP., 7910, 7915
Beta, N. SP., 5828; MORPH., 10768, 12334, 12356; HIST., 250, 3711, 4602
Chenopodium, N. SP., 1576, 7979; HIST., 1449
Kochia, N. VAR., 7915
Salicornia, N. SP., 16755

AMARANTACEAE

Achyranthes, N. SP., 3689, 7979; N. VAR., 1573; MORPH., 14628; DIST., 3689
Achyropsis, N. SP., 3689
Amarantus, N. SP., 7979; N. COMB., 3686; DIST., 7915
Celosia, N. SP., 3689

Cyathula, N. SP., 3689
Cyphocarpa, N. SP., 7979
Digera, L. H., 1580
Gomphrena, N. SP., 7979
Lagrezia, N. SP., 3689
Marcellia, N. SP., 7979
Nototrichium, N. SP., 3689
Pandiaka, N. SP., 7979
Psilotrichum, N. SP., 7979, 14583
Pupalia, N. SP., 7979

NYCTAGINACEAE
MORPH., 12343
Boerhavia, N. F., 15423; N. COMB., 19623

BATIDACEAE
TAX., 16786

PHYTOLACCACEAE
TAX., 16786; MORPH., 12343
Gallesia, N. SP., 10116
Rivina, MORPH., 10152

AIZOACEAE
TAX., 16786; MORPH., 12343
Conophytum, N. SP., 19588
Glinus, N. VAR., 7979
Mollugo, N. SP., 7954, 7979; MORPH., 16799
Trianthema, N. SP., 1569, 7979; DIST., 7915, 7953

PORTULACACEAE
TAX., 14609; PHYL., 5837
Anacampseros, N. SP., 10108; HIST., 5837
Calandrinia, N. SP., 14609

Helicteres, SYN., 19635
Pterospermum, N. SP., 14608
Sterculia, N. SP., 7913, 7917, 14608; SYN., 5808, 19635
Theobroma, CYT., 8712
Waltheria, N. SP., 19590; N. COMB., 19659

VIOLALES (PARIETALES)

DILLENIACEAE
Actinidia, N. SP., 19585, 19626; SYN., 19635
Dillenia, N. SP., 19585
Saurauia, N. SP., 16779; SYN., 5808

OCHNACEAE
FLEURYDORA, 1551; N. SP., 1551
Godoya, N. SP., 19614

CARYOCARYACEAE
Anthodiscus, N. SP., 19614
Caryocar, N. SP., 7913

THEACEAE
Adinandra, N. SP., 14585
Camellia, N. VAR., 7916; N. F., 3686; SYN., 19635
Eurya, SYN., 19635
Pyrenaria, N. SP., 14608
Ternstroemia, N. SP., 14585; N. VAR., 3686
Thea, N. COMB., 19635

HYPERICACEAE (GUTTIFERAE, pars)
Caopia, N. SP., 19590
Hypericum, N. SP., 3686, 14584; TAX., 16734; SYN., 19635

CLUSIACEAE (GUTTIFERAE, pars)
Calophyllum, N. SP., 7913, 19650
Caraipa, N. SP., 1554
Garcinia, N. SP., 19579
Haploclathra, N. SP., 7940

DIPTEROCARPACEAE
Dipterocarpoxylon, N. SP., (Ter) 14654
Dipterocarpus, TAX., 16790; HIST., 7849, 16790
Dryobalanops, HIST., 7849
Hopea, N. SP., 10107, 10126
Scaphula, TAX., 10093
Shorea, N. SP., 10107; DIST., 5664
Vatica, SYN., 19636

ELATINACEAE
Bergia, N. SP., 1569
Elatine, N. COMB., 3686

FRANKENIACEAE
Frankenia, N. SP., 7910

COCHLOSPERMACEAE
Cochlospermum, N. SP., (N) 10161

VIOLACEAE
Alsodeia, SYN., 7917, 14583
Melicytus, N. VAR., 19650
Rinorea, N. SP., 7917, 16771, 16775, 19579; N. COMB., 14583
Viola, N. SP., 5770, 5786, 16771; N. VAR., 3686; MORPH., 8993; HIST., 17614; CYT., 17599; L. H., 8993; DIST., 10128

FLACOURTIACEAE
HIST., 10155
Abatia, N. SP., 7957
Azara, TAX., 16734
Buchnerodendron, N. COMB., 14583
Casearia, N. SP., 1572, 7917, 14584
DENDROSTIGMA, 19614; N. SP., 19614
Erythrospermum, SYN., 5808
Flacourtia, SYN., 19635
Homalium, N. SP., 1572
Microsemma, N. SP., 19579
Oncoba, SYN., 14583
Rawsonia, N. SP., 14585
Scolopia, N. SP., 14585
Xylosma, N. VAR., 19650; N. COMB., 19635

STACHYURACEAE
MORPH., 12371
Stachyurus, SYN., 19635

TURNERACEAE
Turnera, N. F., 7957

PASSIFLORACEAE
Passiflora, N. SP., 1563, 19584, 19590; HIST., 14650

CARICACEAE
Carica, MORPH., 3696

LOASACEAE
Acrolasia, SYN., 14601
Cajophora, N. SP., 7957, 19590
Mentzelia, N. SP., 1576, 14601
Nuttallia, SYN., 14601
Touterea, SYN., 14601

BEGONIACEAE
Begonia, N. SP., 19590

OPUNTIALES

CACTACEAE
TAX., 7952; MORPH., 14634; PHYL., 5837, 14634; DIST., 5769, 7952
Carnegiea, MORPH., 12340
Coryphantha, N. SP., 3679, 14615
Echinocereus, MORPH., 14629
Epiphyllum, N. VAR., 7914
Mammillaria, N. SP., 14615
Melocactus, N. SP., 14615
Opuntia, N. SP., 14615
Pereskia, TAX., 14634; MORPH., 14634; HIST., 5837; EMB., 14634
Pereskiopsis, N. SP., 3635
Rebutia, N. SP., 14615
Rhipsalis, HIST., 5837
Tacinga, N. SP., 14615

MYRTALES (MYRTIFLORAE)

THYMELAEACEAE
TAX., 5792; MORPH., 12343
Daphne, N. VAR., 3686; SYN., 19635, 19636; DIST., 4522
Gnidia, MORPH., 3703
Lachnea, N. SP., 19580
Lasiosiphon, N. SP., 5792
OREODENDRON, 19579; N. SP., 19579
Stellera, N. SP., 3680; SYN., 19635
Stephanodaphne, N. SUBSP., 5792
Struthiola, DIST., 10132
Wikstroemia, N. SP., 5752; N. COMB., 19635; SYN., 19636

ELAEAGNACEAE
Elaeagnus, N. SP., 3686

LYTHRACEAE
Lythrum, MORPH., 12373; DIST., 3691
Parsonsia, N. SP., 19590
Rotala, N. F., 7944

LECYTHIDACEAE
Chytroma, SYN., 7913
Couratari, N. SP., 7913
Eschweilera, N. SP., 7913, 19640
Lecythis, N. COMB., 7913

RHIZOPHORACEAE
Anisophyllea, SYN., 19636
Rhizophora, HIST., 3714; CYT., 3714

COMBRETACEAE
Combretum, N. SP., 3641
Conocarpus, DIST., (Pl) 1593
Terminalia, N. SP., 14608; HIST., 12328; DIST., 1436

MYRTACEAE
Caryophyllus, SYN., 5752
Cloezia, SYN., 1572
Decaspermum, N. SP., 5752; SYN., 19635
Eucalyptus, HIST., 12222, 12333
Eugenia, N. SP., 10073, 19579, 19584, 19585; SYN., 19635
Leptospermum, TAX., 19569
Moorea, N. COMB., 1572
Pimenta, N. COMB., 5752
PSIDIOMYRTUS, 1572; N. SP., 1572
Xanthostemon, N. SP., 1572

MELASTOMATACEAE
Allomaieta, DIST., 19614
Anplectrum, N. SP., 3689, 7917
Astronia, N. SP., 5752, 14584
Blakea, N. SP., 14605
Brachyotum, N. SP., 19590
Clidemia, N. SP., 3689
Cyphostyla, N. SP., 19614
Dissotis, N. SP., 3689
Henriettella, N. SP., 3689, 19614
Heterotrichum, N. SP., 14605
Leandra, N. SP., 14605
Loreya, N. SP., 7913
Macairea, TAX., 5785
Medinilla, N. SP., 14584, 14587; TAX., 19582
Melastoma, N. SP., 14584; N. COMB., 3686
Memecylon, N. SP., 14585
Miconia, N. SP., 3689, 14605, 19614
Oxyspora, N. SP., 7917
Plagiopetalum, N. COMB., 19635
Rhynchanthera, N. SP., 3689
Saccolena, DIST., 19614
Sonerila, N. SP., 3689, 14608; SYN., 19635
Tibouchina, N. SP., 3689
Tristemma, N. SP., 3689

ONAGRACEAE (OENOTHERACEAE)
Andora, SYN., 5801
Chylismia, N. SP., 19578
Circaea, MORPH., 12342; EMB., 12342
Clarkia, SYN., 5802

Epilobium, N. COMB., 3642; TAX., 19569; HIST., 17614
Fuchsia, TAX., 19569
Galpinsia, N. SP., 19578
Gauropsis, SYN., 5802
Gayophytum, N. VAR., 5802
Godetia, N. SP., 19587
Hartmannia, SYN., reduced to subg., 5802
Lavauxia, SYN., 5800
Megapterium, TAX., 5800
Oenothera, N. SP., 5801, 5802; N.COMB., 5800; TAX., 5800; CYT., 23, 2219, 6490, 8717, 8753, 17609, 17647; PHYL., 6490, 10097; DIST., 13170
Pachylophus, SYN., 5801
Xylopleurum, SYN., 5802

HYDROCARYACEAE
Trapa, TAX., 3675; DIST., 3675

UMBELLALES (UMBELLIFLORAE)
CYT., 8718; PHYL., 8718

ARALIACEAE
TAX., 3687; CYT., 8718; PHYL., 8718
Acanthopanax, N.SP., 3687; SYN., 19635; CYT., 8718
Aralia, N. SP., 1570, (Mes) 8001; N. SECT., 3687; MORPH., 14632; CYT., 8718; SYN., 5808, 19635
Arthrophyllum, N. SP., 14608
Bonnierella, N. COMB., 19623
Brassaiopsis, N. COMB., 19635
Dendropanax, SYN., 3687

POLEMONIALES (TUBIFLORAE)

CONVOLVULACEAE
Calonyction, DIST., 7953
Calystegia, N. VAR., 3686
Convolvulus, N. SP., 1570, 13170; N. VAR., 5828
Cuscuta, N.COMB., 5820; MORPH., 14637; EMB., 14637
Erycibe, N. SP., 7917, 19585
Evolvulus, N. VAR., 7953
Ipomoea, N. SP., 1551; MORPH., 1580, 16795; EMB., 16795
Maripa, N. SP., 1551
Merremia, N. SP., 1551
Pharbitis, MORPH., 9264
Porana, N. COMB., 19636

POLEMONIACEAE
Gilia, N. SP., 19578
Phlox, TAX., 19582

HYDROPHYLLACEAE

Eriodictyon, N. SP., 3640
Phacelia, N. SP., 1576
Nemophila, N. SP., 1570

BORAGINACEAE

TAX., 17621, 19615; MORPH., 1580; CYT., 17621
Echium, N. VAR., 10129
Ehretia, SYN., 7963
Heliotropium, N. VAR., 7910
Lithospermum, SYN., (Ter) 14657
Lobostemon, N. SP., 3689
Mertensia, N. SP., 7956
Myosotis, SYN., 7916
Oreocarya, N. SP., 19578
Paracaryum, N. SP., 3680
Poskea, TAX., 5812; DIST., 5812
Trigonotis, N. SP., 19586; N. COMB., 7916

VERBENACEAE

Aegiphila, N. SP., 7913, 7963; N. COMB., 19622
Aloysia, N. COMB., 19622
Avicennia, N. VAR., 19622
Callicarpa, N. SP., 7963; N. VAR., 14584; N. COMB., 19636; TAX., 16734; SYN., 5808
Casselia, N. SP., 19622
Citharexylum, N. SP., 19622; SYN., 7963
Clerodendron, N. SP., 14584; N. VAR., 19659
Duranta, N. SP., 19590
KAROMIA, 1553; N. SP., 1553
Lantana, N. SP., 19590
Lippia, SYN., 19622
Petitia, SYN., 7963
Phyla, N. COMB., 19622
Petraea, N. SP., 1554
Pseudaegiphila, SYN., 19622
RECORDIA, 19622; N. SP., 19622
Tectona, MORPH., 158, 7848; L. H., 3537
Verbena, N. SP., 19659; N. F., 10088; TAX., 16734; MORPH., 15413
Vitex, N. SP., 19622; SYN., 19636

MENTHACEAE (LABIATAE)

Ajuga, N. SP., 3656; N. COMB., 10103
Ballota, N. SP., 10128; N. VAR., 10129
Clinopodium, N. SP., 3686
Coleus, N. SP., 14583; CYT., 13015
Dracocephalum, N. SP., 19586
Endostemum, N. SP., 1569
Gomphostemma, N. SP., 7917
Haplostachys, N. COMB., 19638
Hedeoma, N. SP., 19590
Lagochilus, N. SP., 3680
Leonurus, N. F., 19586
Lycopus, MORPH., 4409; CYT., 4409
Mentha, MORPH., 4408; CYT., 4408; EMB., 4408
NAUTOCHILUS, 1569; N. SP., 1569
Nepeta, N. SP., 5753
Origanum, N. VAR., 5832
Orthosiphon, SYN., 1569
Otostegia, N. SP., 10128
Paraphlomis, N. SP., 7917
Perilla, N. SP., 3656
PERIERASTRUM, 1571; N. SP., 1571
Phlomis, N. SP., 19586
Phyllostegia, N. SP., 19638
Physostegia, HIST., 12355
Plectranthus, N. F., 3686; N. COMB., 5761
Pogogyne, N. SP., 19616
EUPOGOGYNE, N. SUBG., 19616
Pogostemon, N. SP., 14584
PSEUDOCIMUM, 1569; N. SP., 1569
Pycnostachys, TAX., 10074, 19589
Salvia, N. SP., 3656, 3680, 5753, 19584; N. COMB., 3686, 10129; TAX., 16734; CYT., 2218
Satureia, N. SP., 7953
Scutellaria, N. SP., 7961, 10103, 19586
Stachys, N. VAR., 1573; N. F., 10088
Stenogyne, N. SP., 19638
Suzukia, N. SP., 3656
Thymus, N. SP., 10113
Tinnea, N. SP., 3641, 19637; TAX., 10074

SOLANACEAE

Capsicum, N.VAR., 3686; MORPH., 3695, 8714; CYT., 8714
Cestrum, N. SP., 3666
Datura, MORPH., 13061; CYT., 21, 77, 8729, 8733, 10743, 13061, 17609, 17617; EMB., 8729
Hyoscyamus, N. SP., 10129; N. VAR., 3686; DIST., 3691
Juanulloa, N. SP., 19614
Lycopersicum, TAX., 3496, 8729; CYT., 2263, 8714, 8729, 8751
Marckia, N. SP., 1554
Nicotiana, N. SP., 7910; MORPH., 14620; HIST., 3698, 14620; CYT., 4374, 4420, 6496, 6501, 8729, 8740, 8741, 10750, 13004, 13006, 13037, 13039, 13057, 15294, 17615; PHYL., 6501
Petunia, CYT., 89, 15294
Physaliastrum, N. SP., 3686
Physalis, N. COMB., 3686; CYT., 8715
Solanum, N. SP., 3686, 7913, 15423, 19579, 19590; TAX., 7749, 9984; CYT., 2221, 4420, 4603, 8714, 10158
Tubocapsicum, N. VAR., 3686
Withania, N. SP., 10128

SCROPHULARIACEAE

Ambulia, N. VAR., 1573
Antirrhinum, N. COMB., 19625; MORPH., 6510; CYT., 6510, 6521
Aptosimum, N. SP., 1569
Artanema, DIST., 7948
Bacopa, N. COMB., 15423
Bartsia, N. SP., 19590
Calceolaria, N. SP., 19590
Castilleja, N. SP., 16773
Celsia, SYN., 7965
Collinsia, CYT., 8744
Craterostigma, N. SP., 14583
Digitalis, N. HYBR., 83; HIST., 14512, 14513; CYT., 83, 4420, 13013
EPIXIPHIUM, 19625; N.COMB., 19625
Escobedia, N. SP., 1560
Euphrasia, N. SP., 3668, 5753, 7948, 19581; N. VAR., 5807
Galvesia, N. COMB., 19625
Glossostigma, N. COMB., 7944
Gratiola, N. VAR., 3645
Hebe, TAX., 19569
Herpestis, SYN., 15423
Lagotis, N. SP., 10117, 19621
Limnophila, N. SP., 7944
Limosella, SYN., 7944
Linaria, N. SP., 5830; N. COMB., 19625; TAX., 19582
Lindernia, DIST., 7948
Maurandya, N. SP., 19625
Mimulus, N. SP., 1570; N. VAR., 3644, 19587
NATHALIELLA, 1555; N. SP., 1555
Pedicularis, N. SP., 16774; TAX., 16734; DIST., 14586
Penstemon, N. SP., 7920, 19578
Rhamphicarpa, N. SP., 14583
Sibthorpia, SYN., 1560
Sopubia, N. SP., 10132
Stemodiopsis, N. SP., 10132
Verbascum, N. SP., 7965; N.HYBR., 5829; MORPH., 7965
Veronica, N. SP., 3680, 5751; N. VAR., 3686, 14586; MORPH., 12372; CYT., 4364; PHYL., 12372; DIST., 3683

BIGNONIACEAE

Adenocalymma, SYN., 7971
Anemopaegma, SYN., 16781
Ceratophytum, N. COMB., 16781
Chilopsis, HIST., 10158
PSEUDOCALYMMA, 7971; N. COMB., 7971
Radermachera, N. SP., 3690
Tecoma, SYN., 5809

PEDALIACEAE

Sesamum, TAX., 3527

OROBANCHACEAE

Aphyllon, SYN., 5768
Lathraea, TAX., 7951; MORPH., 7951; CYT., 6486; L. H., 7951
Orobanche, N. SP., 3686; N. VAR., 5768
Phelipaea, SYN., 5768
Thalesia, SYN., 5768

GESNERIACEAE

Chirita, N. SP., 19584, 19585
Codonanthe, N. SP., 10120
Cyrtandra, N. SP., 5752, 14584
Didissandra, N. SP., 5805
Lysionotus, N. SP., 5805
Saintpaulia, N. SP., 14583
SAINTPAULOPSIS, 19642; N. SP., 19642
Streptocarpus, N. SP., 14583

LENTIBULARIACEAE

Biovularia, MORPH., 3706
Pinguicula, N. VAR., 19622
Utricularia, N. SP., 5805, 7944, 10102, 14583; TAX., 10074; MORPH., 191, 1581; HIST., 3707; L. H., 191

GLOBULARIACEAE

Cockburnia, SYN., 5812

ACANTHACEAE

EMB., 10148; PHYL., 10148
Acanthus, MORPH., 10145, 10146; EMB., 10148
Adhatoda, EMB., 10148
Asteracantha, EMB., 10148
Asystasia, N. SP., 1569
Barleria, N. SP., 10089
Beloperone, EMB., 10148
Blechum, EMB., 10148
Brillantaisia, EMB., 10148
Crossandra, N. SP., 1550, 3641, 14585
Dicliptera, N. SP., 14585; EMB., 10148
Dischistocalyx, N. VAR., 14585
Disperma, N. SP., 14583; N. COMB., 14583
Epiclastopelma, N. SP., 14585
Eranthemum, EMB., 10148
Hemigraphis, EMB., 10148
Hygrophila, N. SP., 7944; SYN., 14583
Isoglossa, N. SP., 14585
Jacobinia, EMB., 10148
Justicia, N. SP., 14585; EMB., 10148; DIST., 7953
KUDOACANTHUS, 7953; N.SP., 7953
Lepidagathis, DIST., 7953
Megaskepasma, TAX., 16734
Mimulopsis, N. SP., 14585
Pseuderanthemum, N. SP., 14585
Ruellia, EMB., 10148
Rungia, N. SP., 14585
Schaueria, EMB., 10148
Staurogyne, N. SP., 5771
Strobilanthes, N. SP., 7941
Thunbergia, EMB., 10148

PLANTAGINALES

PLANTAGINACEAE

Littorella, DIST., 13160
Plantago, N. SP., 7968, 10096, 19586; N. COMB., 10133; TAX., 2220, 12336; MORPH., 12336; HIST., 16679; CYT., 2220; L. H., 13153; PHYL., 2220

RUBIALES

RUBIACEAE

TAX., 14612; CYT., 6489
Acranthera, N. SP., 7917
Alseis, N. SP., 19622
Anisomeris, N. COMB., 14612; TAX., 14612
Antirrhoea, N. COMB., 19650
Arcythophyllum, N. SP., 19590
Argostemma, N. SP., 14602
Asperula, CYT., 6489
Atractocarpus, N. SP., 1572
Basanacantha, SYN., 14812, 16775
Bertiera, N. SP., 14612
Bouvardia, CYT., 6489
Canthium, N. SP., 19579; N. COMB., 19650
Chomelia, SYN., 14612
Cinchona, HIST., 3714
Coffea, N. SP., 3657; TAX., 16595; MORPH., 16595; CYT., 6489
Coprosma, N. SP., 5752; TAX., 19569
Coptosapelta, TAX., 3690
Coussarea, N. SP., 7913
Crucianella, N. VAR., 10128; CYT., 6489
Damnacanthus, SYN., 19636
DINOCANTHIUM, 1569; N. SP., 1569
Dolicholobium, N. SP., 14602
EDITHEA, 19641; N. SP., 19641
Elaeagia, N. SP., 7913
Evea, N. SP., 19590
Galium, N. SP., 19586, 19590; N. VAR., 5832; N. F., 3686; CYT., 6489
Gardenia, N. COMB., 7961; CYT., 6489
Grumilea, SYN., 5774
Guettarda, SYN., 19650
Hedyotis, N. SP., 14602, 19585; N. COMB., 7917, 19584
Hoffmannia, N. N., 14612
Houstonia, CYT., 6489
Hypobathrum, N. SP., 14602
Ixora, N. SP., 5752, 14602; N. VAR., 19650
Kadua, N. SP., 5752
Lasianthus, N. SP., 14584, 14600, 14602, 19584
Machaonia, N. SP., 14612
Mussaenda, N. SP., 5752, 14584
Mycetia, N. SP., 7917
Myrmecoides, N. SP., 14602
Oldenlandia, N. SP., 1551, 1569, 5819; N.COMB., 1574; SYN., 19584; CYT., 6489
Ophiorrhiza, N. SP., 5752, 14584, 14602; N. COMB., 7917
Otiophora, N. COMB., 14583
Paederia, N. SP., 14600
Pavetta, N. SP., 1569
Pentanisia, SYN., 14583
Pentas, CYT., 6489
Phuopsis, CYT., 6489
Phyllis, CYT., 6489
Plectronia, N. SP., 5752, 14602; SYN., 19650
Plectroniella, N. SP., 1569
Pseudopyxis, N. VAR., 3686
Psychotria, N. SP., 5752, 5774, 14602; SYN., 7918; CYT., 6489
Pygmaeothamnus, N. SP., 14583
Randia, N. SP., 14602, 14612; N. VAR., 1572; N. F., 3686; N. COMB., 16775
Rubia, N. SP., 14584, 14600
Rudgea, N. SP., 16775
Sabicea, N. SP., 7940
Serissa, N. VAR., 3686
Spermacoce, SYN., 19584; CYT., 6489
Straussia, SYN., 7918
Tapiphyllum, N. SP., 14583
Tricalysia, N. SP., 14602
Uncaria, N. SP., 14602
Webera, SYN., 5808
Wendlandia, N. SP., 7917, 7946
Williamsia, N. SP., 14584

CAPRIFOLIACEAE

Abelia, N. VAR., 19626
Calyptrostigma, N. COMB., 3686
Cavalierella, SYN., 5808
Diervilla, SYN., 3686
Lonicera, N. SP., 7917, 19584, 19626; N. VAR., 16734; TAX., 16734; SYN., 19635; MORPH., 12369
Sambucus, N. SP., 19626; HIST., (N) 5862; CYT., 13015
Symphoricarpos, MORPH., 6644
Viburnum, N. SP., 14584, 19685; N. VAR., 3686; N. COMB., 7964; TAX., 16734

VALERIANACEAE

Patrinia, N. VAR., 1574
Valeriana, N. SP., 7966, 10133

DIPSACACEAE

Cephalaria, N. SP., 5772
Knautia, MORPH., 3702, 12345
Pterocephalus, N. SP., 3680
Scabiosa, N. SP., 14600; MORPH., 6599

MYOPORACEAE

Eremophila, N. VAR., 7910
Myoporum, N. SP., 1566

CAMPANULALES (CAMPANULATAE)

CUCURBITACEAE

Anguria, N. SP., 14614
Citrullus, CYT., 8714
Coccinia, N. SP., 14585
Cucumis, N. SP., 10119, 19631; N.VAR., 3686; N.F., 19629; CYT., 8714
Cucurbita, N. SP., 19630; N. VAR., 3686; MORPH., 8762, 12375; CYT., 6486, 8714, 13003
Elaterium, N. COMB., 19659
Gynostemma, SYN., 5809; DIST., 7953
Kedrostis, N. SP., 1569
Luffa, N. SP., 19659
Melothria, N. SP., 7917
Momordica, N. SP., 1569, 14585
Sicyos, N. COMB., 7918
SIRAITIA, 7917; N. SP., 7917
Trichosanthes, DIST., 7953

CAMPANULACEAE

Adenophora, N. VAR., 19586
Campanula, N. SP., 5829; N. VAR., 16734; TAX., 8849
Centropogon, N. SP., 7912
Cervicina, N. COMB., 19581
Codonopsis, N. SP., 19627
Cyananthus, TAX., 19582
Downingia, N. SP., 19587
Githopsis, N. SP., 1570
Lobelia, N. SP., 7912, 14583; N. VAR., 14584; TAX., 10074

Steineria Ditlev., **SYN.**, 20032; *Steineriella* n. n. for, 20031
STEINERIELLA, n. n. for *Steineria* Ditlev., 20031; **TAX.**, 20034
Symplocostoma, **N. SP.**, 20033, 20040; **SYN.**, 20031
Viscosia, **N. SP.**, 20037
Ypsilon, **SYN.**, 20041

ALAIMIDAE
Alaimus, **TAX.**, 20039

TRIPYLIDAE
CYATHONCHUS, 20034; **N. SP.**, 20034
Trilepta, Trileptium n. n. for, 20034
TRILEPTIUM, n. n. for *Trilepta*, 20034
Trilobus, **N. SP.**, 17126; **DIST.**, 1792
Tripyla, **N. SP.**, 20039

IRONIDAE
Dolicholaimus, **N. SP.**, 20032, 20033, 20040
Ironus, **DIST.**, 1792
Syringolaimus, **SYN.**, 20041

MONONCHIDAE
Mononchus, **TAX.**, 16299, 20039; **DIST.**, 1792

DORYLAIMATA

DORYLAIMIDAE
Actinolaimus, **TAX.**, 17126
Brachynema, Brachynemella n. n. for, 20034
BRACHYNEMELLA, n. n. for *Brachynema*, 20034
Diphtherophora, **N. SP.**, 3963
Dorylaimus, **N. SP.**, 17126; **TAX.**, 20039; **DIST.**, 1792
ENOPLOCHILUS, 17126; **N. SP.**, 17126

MERMITHIDAE
MORPH., 16299
Agamermis, **N. SP.**, 1796; **L. H.**, 1796
AMPHIMERMIS, 6104; **N. SP.**, 6104; **L. H.**, 6104
Mermis, **L. H.**, 2026
Paramermis, **N. SP.**, 1792

TRICHURIDAE
Capillaria, **N. SP.**, 17110, 17116, 17129; **L. H.**, 1803, 7413
Hepaticola, **L. H.**, 12589
Trichocephalus, **L. H.**, 17128
Trichuris, **N. SP.**, 3965, 17121; **DIST.**, 9686, 16316

DIOCTOPHYMATA

DIOCTOPHYMIDAE
Eustrongylides, **N. SP.**, 1808; **N. N.**, 16299

SOBOLOPHYMIDAE
Sobolophyme, **N. SP.**, 10339 [See also B. A. 10:7099]

ACANTHOCEPHALA

TAX., 8276; **MORPH.**, 8276; **L. H.**, 8276; *Acanthogyridae*, **SYN.**, 14881; *Quadrigyridae*, **SYN.**, 14881
Aspersentis, **TAX.**, 8272
Centrorhynchus, **N. SP.**, 8273
Echinorhynchus, **MORPH.**, 8275; **DIST.**, 8275
Farzandia, **SYN.**, 14881
Gigantorhynchus, **DIST.**, 8274
GORGORHYNCHUS, 8272; **N. SP.**, 8272
NIPPORHYNCHUS, 8272; **N. COMB.**, 8272

VERTEBRATA

TAX., (†) 19692; MORPH., 1669, 8783, 5882, 8073, 10189, 16891, 19757; HIST., 1685, 8092, 16891; EMB., 8092, 10189, 16891; PHYL., 10189

LEPTOCARDII · MARSIPOBRANCHII · OSTRACOPHORI · ARTHRODIRA ELASMOBRANCHII · PISCES

(System of classification, in the main, according to Jordan, "A Classification of Fishes" (1923), with modifications from his later works. For Conodonts see under *Conodonts* in the subject index.)

LEPTOCARDII

AMPHIOXI

BRANCHIOSTOMIDAE
Branchiostoma, MORPH., 19733; EMB., 12492; L. H., 2113
EPIGONICHTHYIDAE
Asymmetron, MORPH., 19738

MARSIPOBRANCHII (CYCLOSTOMATA)

MORPH., 10190, 19723; L. H., 2113; PHYL., 10190

HYPEROTRETA

MYXINIDAE
Myxine, MORPH., 8067, 16863; EMB., 3844
EPTATRETIDAE
Bdellostoma, MORPH., 8067

HYPEROARTIA

PETROMYZONIDAE
HIST., 16994
Entosphenus, CYT., 17633; EMB., 19902
Lampetra, EMB., 12505; L. H., 15155
Petromyzon, MORPH., 2915, 8777, 8067, 16863; HIST., 2794; L. H., 15155
GEOTRIIDAE
Geotria, EMB., 3845

OSTRACOPHORI

Ostracodermata, MORPH., 10190; PHYL., 10190

HETEROSTRACI

CARDIPELTIDAE, N.FAM., (†) 8545; PROTASPIDAE, N. FAM., (†) 8545

PSAMMOSTEIDAE
Acanthaspis, TAX., (†) 15151
Lunaspis, TAX., (†) 15151

DREPANASPIDAE
Drepanaspis, TAX., (†) 15151

PROTASPIDAE
PROTASPIS, (†) 8545; **N. SP.**, (D) 8545

PTERASPIDAE
Cardipeltis, N. SP., (D) 8545
Cyrtaspis, N. SP., (D) 8545
Pteraspis, N. SP., (D) 8544; TAX., (†) 15151; SYN., (D) 8545

PORASPIDAE
CRYPTASPIS, (†) 8546; N.SP., (D) 8546

OSTEOSTRACI

MORPH., 19723

CEPHALASPIDAE
CEPHALASPINAE, N. SUBFAM., (†) 17420; **KIAERASPINAE**, N. SUBFAM., (†) 17420
Benneviaspis, N. SP., (D) 17420
Cephalaspis, N. SP., (D) 8545, (D) 17420
Hemicyclaspis, N. VAR., (S) 17420
SECURIASPIS, (†) 17420; N. SP., (D) 17420

THYESTIDAE
Eukeraspis, SYN., (D) 17420
Sclerodus, TAX., (D) 17420

ANTIARCHA

TAX., (†) 15152; MORPH., (†) 15152; PHYL., (†) 15152; DIST., (†) 15152; **REMIGOLEPIDAE**, N. FAM., (†) 15152

ASTROLEPIDAE
Asterolepis, MORPH., (D) 15152
Bothriolepis, N. SP., (D) 15152; MORPH., (D) 15152; DIST., (D) 15152
Pterichthyodes, MORPH., (D) 15152

REMIGOLEPIDAE
REMIGOLEPIS, (†) 15152; N. SP., (D) 15152

CYCLIAE

PALAEOSPONDYLIDAE
Palaeospondylus, MORPH., (S) 19683; PHYL., (S) 19683

INCERTAE SEDIS
(In Ostracophori)

TAUNASPIS, (†) 15151; N. SP., (D) 15151

ARTHRODIRA

MORPH., (†) 17424; PHYL., (†) 17424

STEGOPHTHALAMI

ASTEROSTEIDAE
Asterosteus, TAX., (D) 20493

TEMNOTHORACI

HOMOSTEIDAE
Angarichthys, TAX., (†) 20478
Heterosteus, TAX., (†) 20478
Homosteus, N. SP., (D) 20478

ARTHROTHORACI

COCCOSTEIDAE
ANARTHRASPIS, (†) 8546; N. COMB., (D) 8546
Coccosteus, N. SP., (D) 12884; TAX., (D) 6394; MORPH., (†) 17424; SYN., (D) 8546
Euryaspis, N. SP., (D) 8546
Phlyctaenaspis, TAX., (†) 15151
Svalbardaspis, SYN., (D) 8546

DINICHTHYIDAE
Dinichthys, MORPH., (†) 17424

ELASMOBRANCHII

MORPH., 10190, 12426, 19723; HIST., 8062; PHYL., 10190; *Plagiostomata*, MORPH., 3756

SELACHII

MORPH., 3761

ACANTHODEI

ACANTHOESSIDAE
Machaeracanthus, N. SP., (D) 8546; TAX., (†) 15151

ICHTHYOTOMI

XENACANTHIDAE
Pleuracanthus, MORPH., 3761
Xenacanthus, MORPH., 3761

CLADODONTIDAE
Cladodus, MORPH., 3761
Protodus, TAX., (D) 20493

GYRACANTHIDAE
Gyracanthus, TAX., (D) 15151

POLYSPONDYLI

ONCHIDAE
Onchus, N. SP., (D) 8546; TAX., (†) 15151

CESTRACIONTES

HETERODONTIDAE
CARINACANTHUS, (†) 12868; N. SP., (Tr) 12868
Heterodontus, EMB., 19901; DIST., 10629
Hybodus, N. SP., (Tr) 17414; MORPH., 3761
Polyacrodus, N. SP., (Tr) 15153

SELACHOPHIDICHTHYOIDEI

CHLAMYDOSELACHIDAE
Chlamydoselachus, MORPH., 3761

EUSELACHII

SCYLLIORHINIDAE
Cephaloscyllium, DIST., 10629
Pristiurus, MORPH., 12426; HIST., 14703
Scyllium, MORPH., 12426; HIST., 19817; EMB., 19903

RHINEODONTIDAE
Rhineodon, MORPH., 20477

CARCHARIIDAE
Odontaspis, DIST., 10629

LAMNIDAE
Carcharodon, N. SP., (E) 4227
EOCARCHARODON, N. SUBG., (†) 4227

GALEIDAE
Carcharhinus, N. SP., 10629
Galeocerdo, L. H., 15438
Gemundina, TAX., (D) 20493
Mustelus, MORPH., 14683; HIST., 8062
Scoliodon, DIST., 6380

TECTOSPONDYLI

SQUALIDAE
Acanthias, MORPH., 12426
Etmopterus, L. H., 15438
Squalus, MORPH., 3777, 14683; L. H., 13185; DIST., 10629

BATOIDEI

PRISTIDAE
DALPIAZIA, (†) 12869; N.SP., (K) 12869
Pristis, L. H., 15438

PLATYRHINIDAE
Platyrhina, N. SP., 20491

RAJIDAE
Raja, TAX., 6392; MORPH., 15154; HIST., 8062, 14703; EMB., 14703; L. H., 15438; DIST., 10629

TORPEDINIDAE
Torpedo, HIST., 8092, 14703, 19817; EMB., 8092

DASYATIDAE
Dasybatus, DIST., 8543
Pteroplatea, MORPH., 17418; L.H., 17418; DIST., 17418

MOBULIDAE
CERATOPTERINAE, n. n. for *Mantinae*, 2105; *Mobulinae*, SYN., 2105
Mobula, L. H., 15438

HOLOCEPHALI

TAX., 540

CHIMAEROIDEI

PTYCTODONTIDAE
Rhamphodontus, TAX., (†) 17424
RHAMPHODOPSIS, (†) 17424; N. SP., (D) 17424

CHIMAERIDAE
Chimaera, N. SP., 10629; MORPH., 12426

CALLORHYNCHIDAE
Callorhynchus, TAX., 540

INCERTAE SEDIS
(In Elasmobranchii)

Arctacanthus, SYN., (Pr-Cb) 20493
Conolepis, TAX., (D) 20493
Dolophonodus, SYN., (Pr) 20493
Hamatus, TAX., (Pr) 20493

Sellosaurus, SYN., (†) 12914

ZANCLODONTIDAE
Euskelosaurus, **TAX.**, (†) 12914
Gigantoscelis, **TAX.**, (Tr) 12914
Gresslyosaurus, SYN., (†) 12914
Pachysaurus, N. SP., (Tr) 12914

ANCHISAURIDAE
Aetonyx, SYN., (†) 12914
Ammosaurus, **TAX.**, (Tr) 12914
Anchisaurus, SYN., (†) 12914
Aristosaurus, SYN., (†) 12914
Gyposaurus, SYN., (Tr) 12914
Thecodontosaurus, SYN., (†) 12914
YALEOSAURUS, (†) 12914; N. COMB., (Tr) 12914

HALLOPODIDAE
DOLICHOSUCHUS, (†) 12914; N. SP., (Tr) 12914

PALAEOSAURIDAE
Palaeosaurus, N. SP., (Tr) 12914

PLATEOSAURAVIDAE
PLATEOSAURAVUS, (†) 12914; N. COMB., (Tr) 12914

PODOKESAURIDAE
AVIPES, (†) 12914; N. SP., (Tr) 12914
SPINOSUCHUS, (†) 12914; N. SP., (Tr) 12914
VELOCIPES, (†) 12914; N. SP., (Tr) 12914

COMPSOGNATHIDAE
RAPATOR, (†) 12914; N. SP., (K) 12914

COELURIDAE
CAUDOCOELUS, n. n. for *Saurornithoides*, (†) 12914; N. SP., (J) 12914
FULGUROTHERIUM, (†) 12914; N. SP., (K) 12914
Halticosaurus, N. SP., (Tr) 12914
ILIOSUCHUS, (†) 12914; N. SP., (J) 12914
Saurornithoides, *Caudocoelus* n. n. for, (†) 12914

MEGALOSAURIDAE
MAGNOSAURUS, (†) 12914; N. SP., (J) 12914
Megalosaurus, SYN., (†) 12914
Sarcosaurus, N. SP., (J) 12914

DINODONTIDAE
Erectopus, N. SP., (K) 12914

SPINOSAURIDAE
Spinosaurus, **TAX.**, (†) 12914

ORNITHOMIMIDAE
BETASUCHUS, (†) 12914; N. COMB., (K) 12914
Ornithomimus, **TAX.**, (†) 15181
Struthiomimus, SYN., (†) 15181
WALGETTOSUCHUS, (†) 12914; N. SP., (K) 12914

CETIOSAURIDAE
MAGYAROSAURUS, N. SP., (†) 12914; N. SP., (K) 12914
Titanosaurus, SYN., (†) 12914

INCERTAE SEDIS
(In Saurischia)
MONGOLOSAURUS, (†) 2129; N. SP., (K) 2129

ORNITHISCHIA

NODOSAURIDAE
PINACOSAURUS, (†) 2129; N. SP., (K) 2129

CERATOPSIDAE
Triceratops, N. SP., (K) 15167; **MORPH.**, (†) 20507

ICHNITES

(In Amphibia and Reptilia)

GRIPPIDAE, (†) 4257
Asperipes, N. SP., (Cb) 8020
Baropus, N. SP., (Pr) 1621
Hylopus, **TAX.**, (Cb) 8020
Ichnites, N. SP., (Tr) 12914
Laoporus, N. SP., (Cb) 8020
ORNITHOIDIPUS, (†) 8020; N. SP., (Cb) 8020
Pseudobradypus, **TAX.**, (Cb) 8020

AVES

TAX., 2140, 6436, (†) 19692, 20545; MORPH., 1626, 1627, 1639, 1641, 1684, 3757, 5879, 5883, 5895, 5902, 8043, 8044, 10189, 12413, 14689, 15183, 15188, 18561; HIST., 1685, 12413, 19805; EMB., 1639, 1684, 10189; PHYL., 10189, 14689; L. H., 12918; PHYL., 3152; DIST., 6438, 20548; **ARCHAEOPTERYGOMORPHI**, n. n. for *Archaeornithes*, 19692; **DIATRYMATIFORMES**, n. n. for *Diatrymae*, 19692; **HESPERORNITHOMORPHI**, n. n. for *Odontoceles*, 19692

(Arrangement of orders and families according to Wetmore, "A Systematic Classification for the Birds of the World, Revised and Amended" (1934).)

STRUTHIONIFORMES

STRUTHIONIDAE
Struthio, MORPH., 5883, 5895

RHEIFORMES

RHEIDAE
Rhea, N. SSP., (N) 6419

CASUARIIFORMES

CASUARIIDAE
Casuarius, MORPH., 5895

TINAMIFORMES

TINAMIDAE
Crypturellus, N. SSP., 4274, 12925; TAX., 15191
Nothura, N. SSP., 4274
Tinamus, TAX., 4274

SPHENISCIFORMES

GEOGRAPHICAL INDEX

(For introductory guide see page 2383)

NORTH AMERICA

North America (general):
climate, agriculture, fishing, etc., book, ...4353
cultivated conifers, ...14581
fossil (Cb) floras, correlated with European, ...1597
mammal-bearing formations (Ter), ...8018
plankton faunas (Pal), 10177
trees, book, ...14582
zoogeography, ...13131
Algae, ...(Cb, D)3729, (†)10038, 19525
Amphibia, ...12905
Angiospermae, ...16743, 16751 16786
Arachnida, ...14981, 17227
Aves, ...6445, 10703, 12937, 15185, 15194, 15195, 15199, 20551, 20573
Bryozoa, ...10367
Coleoptera, 17238, 20143, 20167
Collembola, ...8531
Crustacea, ...4051, 20093
Diptera, ...20217, 20220
Fungi, ...1495, 10049
Gymnospermae, ...14581
Hemiptera, ...20282
Homoptera, ...20289, 20302
Isoptera, ...12860
Mammalia, ..(N)20654(p.2380)
Mollusca. (O, S)6151, (Cb)17164
Nematoda, ...6105
Orthoptera, ...17365
Platyhelminthes, ...1787
Pteridophyta, ...(Pr)1605
Arctic, vegetation, ...10897
zoogeography, ...10875
Bryophyta, ...12314
Coelenterata, ...6077
Mammalia, ...10712
central, phytogeography, ...15431
eastern, Aves, ...6417, 15215
Pisces, ...12875
southeastern, Mollusca, ..(E)6152 14940
western, Angiospermae, ...14599
Aves, ...10690
Pisces, ...12875

ALASKA (including ALEUTIAN ISLANDS):
forests, ...7844
vegetation, ...4510, 8840
Angiospermae, ...5754, 16773, 19661
Arachnida, ...4072
Aves, ...6449, 12924, 20547
Bryophyta, ...10059, 10060
Coleoptera, ...20156
Diptera, ...1958, 12739
Fungi, ...12310
Hymenoptera, ...6817
Lepidoptera, ...4153, 12805, 15099
Mammalia, ...2190, 6472, (Pl)16832, (Pl)20584, 20627(p.2378)
Mecoptera, ...20436
Pisces, ...12878, 12888, 12889
Protozoa, ...8194

GREENLAND:
chorography, ...130
fossil plants, ...(Cb, D)1596
marine animal communities, ...10878
stratigraphy, ...(Cm-O)1615
vertebrate localities, ...(D)12398
Angiospermae, ...3663, 10106, 13163, (Ter)14673
Annelida, ...(Tr)1619, (Tr)10402
Aves, ...10688, 12946, 12948, 15184, 17460

Nemertea, ...12595
Protozoa, ...8222, 12531, 14835
Siphonaptera, ...4058

OCEANIC ISLANDS

ATLANTIC ISLANDS

ATLANTIC ISLANDS, EASTERN (north to AZORES, south to TRISTAN DA CUNHA and GOUGH ISLANDS):
oceanography, ...15438
Arachnida, ...14970, 14981, 20126
Aves, ...4268
Bryophyta, ...3613, 10666
Chilopoda, ...20076
Coelenterata, ...14860, 19984
Coleoptera, ...1938
Diptera, ...1956, 4121, 15032, 17271, 20256
Hymenoptera, ...6314
Mollusca, ...17160
Pisces, ...2101
FALKLAND ISLANDS:
Arachnida, ...6183
Nemertea, ...12595
Porifera, ...17091
Protozoa, ...19968

INDIAN OCEAN ISLANDS

(Including Kerguelen, Crozet and Prince Edward Islands, excluding Ceylon and Madagascar)

biota of Kerguelen I., ...4485
crop pests, ...1278
Algae, ...12248, 12250, 16694
Angiospermae, ...5812, 7946
Annelida, ...12604, 17135
Arachnida, ...20126
Aves, ...2143, 12921, 12928, 15204, 20545
Bryophyta, ...19567
Coelenterata, ...3931
Coleoptera, ...8401, 10487
Crustacea, 10428, 20089, 20100, 20104
Diptera, ...1968, 8420, 20234, 20250
Hymenoptera, ...15094
Lepidoptera, 2038, 10571, 16487, 20398
Mollusca, ...10391, 10401, 14942
Platyhelminthes, ...1774, 12562, 14197
Prochordata, ...2087

PACIFIC ISLANDS

Mollusca, ...12639
Pisces, ...2104
Reptilia, ...10649, 10665

GALAPAGOS ISLANDS and COCOS ISLAND:

vegetation, ...19659
Angiospermae, ...7954, 16765, 19659
Annelida, ...6119, 8283
Arachnida, ...17225, 17227
Aves, ...15194
Bryophyta, ...1515
Crustacea, ...12664, 12670
Diptera, ...6235, 8424, 20210, 20250, 20273
Fungi, ...12304
Hymenoptera, ...6317
Lepidoptera, ...2048
Mollusca, ...10401
Orthoptera, ...12852
Pisces, ...6396
Pycnogonida, ...8380
Reptilia, ...10660

HAWAIIAN ISLANDS:

fauna, littoral, ...10852
native medicine, ...16664
natural history, ...17550
plant sap constants, ...8842
Algae, ...3574, 14542, 16694
Amphibia, ...10649
Angiospermae, 1565, 1568, 3689, 5778, 7918, 19591, 19638
Annelida, ...12606
Arachnida, ...1898, 17225
Aves, ...2164
Coleoptera, ...12733
Crustacea, ...8335
Diptera, ...1957, 4115, 6235, 15043, 20250
Hymenoptera, ...16527
Isoptera, ...12860
Lepidoptera, ...5440
Mollusca, ...8328, 14934, 17175, (Q)17175
Nematoda, ...17123
Nemertea, ...10347
Odonata, ...10606
Pisces, ...12887
Pteridophyta, ...10071
Reptilia, ...10649

JUAN FERNANDEZ, ST. AMBROSE and ST. FELIX ISLANDS:

flora, ...187

MELANESIA (including BISMARCK ARCHIPELAGO, FIJI, LOUISIADE ARCHIPELAGO, LOYALTY, NEW CALEDONIA, NEW HEBRIDES, SANTA CRUZ, and SOLOMON groups):

crop pests, ...1278
insect pests, ...7608
plants, ...(†)12399
vegetation of Loyalty Isls., ...3689
Amphibia, ...6400, 12905
Angiospermae, ...1572, 3684, 3689, 14588, 16761
Arachnida, ...8362, 17225
Aves, ...2148, 2149, 2150, 8595, 15198, 20532
Brachiopoda, ...(N)12399
Coelenterata, ...(†)12399
Coleoptera, ...4084, 8386, 8389, 8411, 12732, 12736, 15002, 20158
Crustacea, ...6178, (N, Pl)12399
Dermaptera, ...20447
Diptera, ...1968, 6235, 6250, 12105, 12750, 15025, 20250
Echinodermata, ..(N)12399, (N)12608
Hemiptera, ...6276, 10521
Homoptera, ...12774, 17297, 20298
Hymenoptera, 6311, 6318, 15093, 17320
Lepidoptera, 8518, 10571, 15116, 20398
Mammalia, ...20653(p.2380)
Mollusca, ...10391, (N)12399, 20068
Nematoda, ...7608, 17127, 20034
Orthoptera, ...20447
Pisces, ...2101, 2104, (†)12399
Protozoa, ...(N)12399
Pteridophyta, ...3684
Reptilia, ...6400

MICRONESIA (including CAROLINE, BONIN, GILBERT, MARIANNE (or Ladrone), GUAM, MARSHALL, PELEW, and VOLCANO ISLANDS):

Angiospermae, ...16760
Arachnida, ...17225
Aves, ...2148, 10684
Diptera, ...6235, 20250
Hymenoptera, ...8483
Mammalia, ...10730, 17499
Odonata, ...10607
Platyhelminthes, ...14864
Pteridophyta, ...12321

POLYNESIA (including COOK, EASTER, ELLICE, LOW (or Tuamotu) ARCHIPELAGO, MANIHIKI, MARQUESAS, PHOENIX, SAMOA, SOCIETY, TONGA, TUBUAI, and UNION groups; excluding Hawaiian Islands):

flora of Samoa, ...19655
Algae, ...16694
Angiospermae, ...1566, 5752, 7969, 10082, 14595, 19623, 19638, 19650, 19662
Annelida, ...8923
Anoplura, ...12688
Arachnida, ...4062, 12683, 12684, 14971, 17225
Aves, ..2147, 2149, 8595, 12928, 15198
Bryophyta, ...1514
Chilopoda, ...4028
Coelenterata, ...3923, 19984
Coleoptera, ...6206

Collembola, ...20455, 20456
Crustacea, ...12647, 20094
Dermaptera, ...12853, 20450
Diplopoda, ...4028
Diptera, ...4114, 4116, 4117, 6235, 6250, 6257, 15043, 20250
Homoptera, ...8457, 8458, 10536
Hymenoptera, ...17321, 17322, 20331, 20337, 20338, 20379
Lepidoptera, ...20394, 20398, 20415, 20424, 20425, 20426
Mollusca, ...6138, 6157, 10382
Odonata, ...20438, 20439
Orthoptera, ...12853, 20450
Pisces, ...2101, 2104
Pteridophyta, ...1535, 19662
Thysanoptera, ...17373, 20459
Thysanura, ...20461

OCEANS

ANTARCTIC OCEAN:
bottom deposits, ...10867
modern whaling, ...15241
Aves, ...20529
Coelenterata, ...6075, 17102
ARCTIC OCEAN:
bacteriology of Barents Sea, ...19173
biogeographical limits, ...4479
bottom fauna of Barents, White, and Kara seas, ...15440
iodine-bearing algae of White Sea and Murman coast, ...16700
plankton, ...10735, 15439
Algae, ...10735, 12250, 16697
Annelida, ...10735, 10739
Arachnida, ...10735
Brachiopoda, ...10735
Bryozoa, ...10735, 10739
Chaetognatha, ...10735
Coelenterata, ...10735, 10739, 19986
Crustacea, ...10735, 10739, 12653
Ctenophora, ...10735

GEOLOGICAL INDEX TO PALEONTOLOGICAL MATERIAL

(For introductory guide see page 2384)

PRE-CAMBRIAN

Algae, ...14658
Protozoa, ...19966

PALEOZOIC

Paleozoic (general):
Agnathi and fishes,.....15144
fauna and flora of Texas, 14675
insect-bearing beds of the Kuznetsk basin, ...8538
plankton of N. America,..10177
Crustacea, ...10179
Gymnospermae, ...10163
Mollusca, ...10397
Pisces, ...20493

CAMBRIAN:
shelled fossil, ...10171
stratigraphy, Greenland, ...1615
Algae, ...19674
Annelida, ...19686
Brachiopoda, ...5872, 10173, 16822, 16823, 19686
Bryozoa, ...19686
Coelenterata, ...16823
Crustacea, ..5872, 10173, 16822, 17210, 17220, 16823, 19686
Mollusca, ..5872, 10173, 16822, 16823, 19686
Stromatoporoidea, ...16833

ORDOVICIAN:
fauna of Utah,.....19685
stratigraphy, in Greenland,....1615
Algae, ...10364, 12392
Annelida, ...12401, 12607
Brachiopoda, ...5866, 6124, 10168, 10358, 10364, 10365, 12392, 12401, 14895, 16822, 19685
Bryozoa, ...12392, 12401
Coelenterata, ...12392
Conodonts, ..3744, 3745, 12401, 19697
Crustacea, ...1871, 10168, 10179, 12392, 12401, 16822, 19685
Echinodermata, ..10368, 12392, 12401
Eurypterida, ...8381
Graptolitoidea, ...5869, 8010, 10168, 10178, 12401, 14667, 14674, 14676
Mollusca, ..4023, 10168, 12392, 12401, 16822, 17172, 19685
Porifera, ...12392, 12401
Protozoa, ...3905, 19966

SILURIAN:
fauna of Pennsylvania,.....19698
Algae, ...5866
Brachiopoda, ...3988, 6123, 12392, 14894, 19698
Bryozoa, ...12392
Chitinozoa, ...3737
Coelenterata, ...3925, 14861, 17101
Crustacea, ...4053, 14966, 19698
Echinodermata, ...4001, 10376
Graptolitoidea, (S)3924, 14671, 14676
Mollusca, ...4023, 10383
Ostracophori, ...17420, 19683
Protozoa, ...3905, 5866
Stromatoporoidea, ...8017
Xiphosura, ...8383

DEVONIAN:
faunas, ...14678
fauna of Urals,.....16813
flora, Germany, ...5867
Old Red Sandstone flora of Scotland, 3726
plants from Greenland,.....1596
Algae, ...1620, 3729
Annelida, ...1620, 3979, 19687
Arthrodira, ...6394, 8546, 12884, 15151, 20478
Brachiopoda, ...1616, 1619, 1620, 3736, 3738, 5867, 6126, 14670, 14899, 14956, 16816, 19687
Bryozoa, ...1619, 19687
Coelenterata, ...5867, 14956, 19687
Crustacea, ...1616, 1620, 1884, 3736, 3738, 5867, 6182, 10420, 10421, 12650, 12656, 14956, 19687
Echinodermata, ...1619, 1822, 3736, 4003, 3997, 14908, 19687
Elasmobranchii, ...1619, 8546, 15151, 17424
Eurypterida, 1620, 8546, 10447, 10455
Fungi, ...3726
Mollusca, ...1616, 1619, 1620, 3736, 3738, 4003, 5867, 6148, 6151, 14670, 14956, 19687
Ostracophori, ...8544, 8545, 15151, 15152, 17420
Pisces, ...1620, 5867, 6394, 20480
Protozoa, ...19966
Pteridophyta, ..1608, 1620, 3726, 5861, 14653, 19680
Pycnogonida, ...4070
Stromatoporoidea, ...16818, 16819
Vertebrata, ...12398

CARBONIFEROUS (MISSISSIPPIAN and PENNSYLVANIAN):
fauna of Urals,.....16813
flora, ...16812
floras of Europe and N. Amer. correlated, ...1597
plants, ...1596, 12393, 19679
stratigraphical and floristic studies, Czechoslovakia, ...14662
upper, floras in Wales,.....3722
Algae, ...3729, 8004
Amphibia, ...2124, 12907
Annelida, ...3743
Arthrophyta, ...10160
Blattariae, ...10621
Brachiopoda, ...1619, 3689, 3740, 3743, 3746, 3899, 3990, 3991, 5871, 6128, 6129, 8292, 10359, 10362, 12393, 12400, 14898
Bryozoa, ...1614, 1619, 3743, 5871, 14903, 14904
Coelenterata, 1614, 3743, 5871, 12393, 12557, 19989, 19990, 19995
Conodonts, ...3735, 3739, 5868, 10169, 10170, 12403
Crustacea, ...1869, 1872, 1878, 3740, 3743, 5871, 6168, 6169, 6175, 10172, 12392, 12657, 17223

Gymnospermae, ...8002
Mollusca, ...1611, 1619, 3741, 6137, 6151, 8022, 8331, 10174, 10402, 12627, 19684, 19693
Pisces, ...1619, 8566, 12868, 15137, 15150, 15153, 17399, 17414, 20490

TRIASSIC (*continued*)
Porifera, ...19693
Pteridophyta, ...1595
Reptilia, ...2130, 3741, 4248, 4250, 4254, 4257, 6405, 8578, 12914, 17436, 20501
JURASSIC:
fauna of Bulgaria, ...19684
fauna of California, ...19682
N. American, zoning based on brachiopods, ...10360
wood, ...3728
Brachiopoda, ...1610, 10360, 10363, 14897
Echinodermata, ...1610, 1823, 10371
Gymnospermae, ...1601, 1606, 5864, 14665
Invertebrata, ...10403
Mammalia, ...20596
Mollusca, ...1610, 6137, 10403, 15381, 16808, 17162, 17163, 17178, 17179, 17180, 19693, 19684
Pisces, ...2095, 10646
Protozoa, ..10292, 14854, 19689, 19966
Pteridophyta, ...1606, 5864, 14665
Reptilia, ...4247, 12914, 17441
Stromatoporoidea, ...16827
CRETACEOUS (including **COMANCHEAN**):
fauna of California, ...19682
faunas in Mongolia, ...1609
flints and cherts from uppermost beds of, India, ...19678
pollen in Namaqualand, ...3725
Algae, ...7999, 10040, 19678
Angiospermae, ...14664
Annelida, ...3742, 16808, 16828
Brachiopoda, ...1612, 3742, 10363
Bryozoa, ...3992, 5873
Coelenterata, 3742, 5873, 8235, 12560, 12561, 16828
Crustacea, ...1865, 3742, 4037, 6163, 6170, 8021, 10414, 17204, 19694
Echinodermata, ...1828, 3742, 10174, 10370, 10374, 14906, 16808, 16828
Elasmobranchii, ...3742, 12869
Gymnospermae, ...14664
Mollusca, ...1612, 1851, 3742, 4014, 4021, 5873, 6135, 6137, 7999, 8327, 10168, 10174, 10403, 12627, 16808, 16814, 16828, 17153, 20061, 20065, 20069, 20070, 20074
Pisces, ...3742, 8565
Porifera, ...8229
Protozoa, ...3888, 3896, 3897, 3898, 7999, 8021, 10292, 12547, 12549, 14828, 16828, 19694, 19966
Pteridophyta, ...3727, 5857, 19677
Reptilia, ...2128, 2129, 8577, 12914, 15167, 15175, 17439
Stromatoporoidea, ...16827

CENOZOIC

Cenozoic (general):
evolution of coral reefs, ...142
fauna and flora of Texas, ..14675
Coelenterata, ...20002
Echinodermata, ...17144
Mammalia, ...5874

TERTIARY

Tertiary (general):
faunas in Mongolia, ...1609
faunas, textbook, ...12394
plant relicts, Poland, ...2387
Algae, ...10033, 10040, 10164
Amphibia, ...12902
Angiospermae, ...1601, 8003, 14654, 14657, 14673, 19675
Brachiopoda, ...1613
Bryozoa, ...14673
Crustacea, ...14673
Insecta, ...20466
Mammalia, ...4311, 4312, 8018, 16824, 20583, 20584
Mollusca, ...1613, 12624, 14673, 14937, 16807, 17183
Pisces, ...6397
Protozoa, ...14667, 14829, 19966
Reptilia, ...2128
EOGENE (PALAEOCENE, EOCENE, and OLIGOCENE):
fauna and flora, ...16830, 19699
Algae, ...14672, 19673
Amphibia, ...16831
Angiospermae, ...14663, 19669, 19676
Annelida, ...1617
Aves, ...5875, 6435, 8608, 8609, 15208, 20542
Brachiopoda, ...1617
Bryozoa, ...1617, 8293, 14900
Coelenterata, ...1617, 8235, 12561, 14672, 14677, 19996
Crustacea, ...1617, 1876, 1882, 6164
Echinodermata, ...1617, 14906
Fungi, ...3724
Gymnospermae, ...3731
Insecta, ...16831, 20463
Isoptera, ...6368
Mammalia, ...4304, 4320, 4323, 5875, 5876, 8308, 8636, 8639, 10723, 10729, 12402, 15233, 15239, 16831, 17482, 17494, 17496, 17497, 17498, 17500, 19696, 20582, 20586, 20593, 20621 (p.2378), 20631(p.2378), 20646 (p.2379)
Mollusca, ...1617, 1833, 1840, 4014, 4021, 6136, 6152, 8308, 8327, 10168, 10384, 10394, 10401, 10406, 12621, 12635, 12642, 14672, 14929, 14932, 17157, 20069
Pisces, ...1617, 5875, 6381, 6382, 15140, 19696
Porifera, ...1617, 17095
Protozoa, ...1763, 3892, 3894, 3911, 6046, 6047, 6053, 8012, 8013, 8196, 8202, 12531, 12548, 14672, 14677, 16808, 14829, 19966, 19975
Reptilia, ...5875, 5877, 8576, 10670, 12402, 12910, 12911, 16831, 17439, 19696
Spermatophyta, ...1604
NEOGENE (MIOCENE and PLIOCENE):
flora from the Eden beds, California, 19663
flora of Patagonia, ...5858
Algae, ...1598, 3573, 14669
Angiospermae, 1602, 3734, 5858, 5862, 10161, 14661, 19663, 19665, 19670
Aves, ...6419, 8610, 8611
Brachiopoda, ...12399, 14672
Bryozoa, ...16826
Coelenterata, ...3935, 5870, 8015, 14672, 16826
Coleoptera, ...2081
Crustacea, ...1876, 5870, 8015, 12399
Echinodermata, ...5870, 8016, 12399, 12608, 14669, 16826, 19695
Elasmobranchii, ...5870
Gymnospermae, ...5858, 5862, 19663
Hemiptera, ...2081
Hymenoptera, ...2081, 2082, 8539
Insecta, ...20465
Isoptera, ...2081, 6368
Mammalia, ...4309, 4310, 4316, 4317, 4318, 4323, 6462, 6463, 6477, 6480, 6481, 8627, 8629, 8630, 8631, 8633, 8637, 8644, 8646, 10711, 10716, 10717 10718, 10720, 10721, 10726, 12468, 12958, 12965, 12967, 12969, 15238, 16829, 20584, 20600(p.2377), 20607(p.2377), 20628(p.2378), 20643 (p.2379), 20649(p.2379), 20650 (p.2379), 20654(p.2380), 20655 (p.2380)
Mollusca, ...4012, 4014, 5870, 6145, 6146, 6160, 8015, 8016, 8315, 8321, 10401, 12625, 12635, 12637, 14669, 14672, 14920, 14921, 16826, 17081, 17169, 17171, 17181, 19695
Odonata, ...2081
Pisces, ...6376
Protozoa, ...3892, 3895, 6039, 6060, 8195, 8196, 10303, 12399, 12523, 17081, 19963, 19966
Pteridophyta, ...5858
Reptilia, ...4255, 6480, 8576, 16829, 17440
Trichoptera, ...2081

QUATERNARY

(Including Pleistocene and post-Pleistocene)

African, parallelism with European cultures, ...15877
analysis of pollen, significance, 19664
climate, ...10912
in East Africa, phytogeographic consequences, ...15421
in Japan, ...3723
in Rio Grande drainage, ...2399
fauna, in California, ...5870
in Mongolia, ...1609
Homo sapiens in Minnesota, ...8128
human cranium and animal remains from Mousterian cave shelter at Gibraltar, ...16963
method of dating postglacial periods, 13146
plants from Cuba, ...1593
Sinanthropus and Choukoutien Cave deposits from, ...1700
Sinanthropus, environment, ...1699
vegetation, in Canada, ...181
in England, ...4521
in Europe, ...4526
of N. Amer., ...10921
in Switzerland, ...10905
Angiospermae, ...1593, 3721, 3730
Aves, ...6419, 15211, 16963, 19690, 20527, 20542
Brachiopoda, ...14672
Coelenterata, ...14672
Crustacea, ...12399
Echinodermata, ...10174
Gymnospermae, ...1593, 3721, 3730
Mammalia, ...2180, 4313, 6460, 8627, 8640, 10719, 12965, 12972, 15228, 15238, 16832, 16963, 17484, 19690, 20584, 20590, 20599(p.2377), 20604 (p.2377), 20620(p.2378), 20655 (p.2380)
Mollusca, ...1618, 4008, 4014, 4018, 10401, 12635, 12641, 14672, 14918 14928, 16963, 17175, 19690, 20062
Pisces, ...19690
Protozoa, ...3892
Pteridophyta, ...3721, 3730
Reptilia, ...16963, 19690

SUBJECT INDEX

(For introductory guide see pages 2381-2382)

A

Abacá. (See *Musa textilis.*)
Abacobius (p.2438[4]) fissirostris,....20161
Abatia (p.2398[3]) macrostachya,.....7957
Abavus (p.2446[1]) maculatus,.....1962
Abderhalden reaction. (See *Pregnancy, tests.*)
Abdomen. (See also *Peritoneum.*)
circumference, as affected by alveolar CO_2 and O tensions,.....18423
fibrous tissue, redescription,.....19823
inguinal region, lymphatics, anatomy, ...5928
pain in, review,.....18601
x-ray irradiation, effect on gastric secretion, dog, ...11433
Abelia (p.2400[4]) *biflora* v. minor,...19626
Abia (p.2450[1]) *fulgens* v. unicoloricornis, ...17317
Abidama (p.2434[1]) rufescens,.....20295
rufula, in China,.....20295
Abies (p.2393[1]). (See also *Fir.*)
Corticium on, ...12292
insect pests, ...5451
Poria on, ...19549
Scolytus on,.....20143
alba, disease, induced by acid soil, 10996
dist. and maintenance,.....2385
in Normandy, Coleoptera from,..1307
balsamea, growth of leader, needle and root, interrelations, ...10142
f. hudsonia (*A. h.*),.....7907
concolor, Phytocoris on,.....4130
georgei, ...7909
magnifica, Corticeus on,.....12706
nobilis, viability of seed, as influenced by cold storage,.....2499
pectinata, death in Czechoslovakia, causes, ...3561
freezing injury, symptoms,.....2446
frost, heart, mechanism of injury, 10987
honeydew production on,.....9926
silvicultural management in Normandy, ...5657
pindrow, ecology and silviculture, 10919
sibirica, Zilingia on,.....19548
oec. f. alpina,.....19576
Abietipites (p.2393[1]) † *antiques* (Ter), syn., ...10165
Ability. (See *Intelligence.*)
Ablabesmyia (p.2445[2]) melanosoma, 20228
Ablautus (p.2446[2]) mcgregori,.....8423
Ablepharus (p.2459[1]), range of spp. in Malay Arch., ...15174
boutonii, modified eyelids in, and Harderian gland, ...12419
races in South Sea Is.,.....10665
moeruensis, ...6414
pannonicus, modified eyelids in, and Harderian gland, ...12419
seydeli, ...6414
Ablerus clisiocampae, in scale control, 7615
ABOLODORIA (Dipt.)(p.2449[3]), ...20270
abdominalis, ...20270
Aboma (p.2456[3]) *tsushimae,* syn.,...12393
Abortion, bovine, due to trichomonads, ...3253, 5230, 9648
frequency, and twin births,.....10815
in horses, ...11730
human, *Bacillus welchii* incidence in, significance, ...7489
statistical analysis, ...4889
by x-ray, rabbits,.....18128
Abortion, contagious. (See also *Bang's disease; Brucella abortus;* etc.)
breeding efficiency in relation to,...929
Brucella agglutinins in calves from cows with, persistence, ...19050
Brucella strains from undulant fever causing in cattle,.....14124
Brucella abortus agglutinins in blood sera of " ceased-reactor "cows, 9622
Brucella abortus in uterine fluid and milk of "ceased-reactor" cows, 9622
chemotherapy by dimethylamino-acridine chlorhydrate, ...934
control, chemotherapy and review, 11730
methods and results,.....929
by vaccination and segregation, 1016
course in pregnant vs. non-pregnant heifers after per os inoculation, ...7312
diagnosis by guinea-pig inoculation vs. plate method, ...11727
diagnostic methods, technic and comparisons, ...945
Flavobacterium causing, in mares,...942
general survey, Norway,.....940
histopathology of udder in,.....18963
immunization to, in calves,.....9630
as influenced by virulence of *Brucella* strain used, ...9629
incidence of non-*Brucella* forms in New York State, ...937
origin, history and control in Norway, ...16196
serodiagnosis by agglutination tests in cattle, ...1018
vaccination with living bacilli before vs. during pregnancy, ...9638
Abortus bacteria. (See *Brucella abortus;* etc.)
Abortus fever. (See *Abortion, contagious.*)
Abothropria (p.2451[1]) lloydi, parasite of *Glossina,* 20334
Abramis (p.2454[3]) *brama,* correlation between body growth and scale growth, ...17416
Ergasilus on,.....12662, 14957
Henneguya on, ...7412
trematodes in, ...12564
Abraxas grossulariata, Casinaria from, 7599
melanism in, ...2037
Abrus (p.2397[1]) repens,.....5816
Abscess, bronchogenic pyogenic lung, 5287
burrowing, growth and histology in bone tuberculosis, ...5019
fixation, production and veterinary applications, ...947
minerals in, liver, lung and kidney, ...9428
non-virulent fusiform bacilli causing, in scillaren-B treated tissues, 7485
in soft tissue around mandibles, in Ra poisoning, rats, ...11246
Abscission, breakage of axis of wheat spike, histology, ...10159
of cotton bolls, correlated with osmotic pressure of sap,.....2494
flower, of *Mercurialis,* histology,...7997
of *Stachytarpheta* corollas, mechanism, ...9004
of twigs of *Populus,*.....12386
Absidia, pathogenic in swine stomach, ...18969
Absorption. (See also *Diffusion; Osmosis; Swelling; Water, absorption.*)
articular, of iodine, in normal and pathological conditions, ...18000
of bile in gall bladder, studies with methylene blue, ...18389
of caffein and strychnin in fish, routes, ...17974
of crystalloids from anterior chamber of eye, mechanism, ...18570
cutaneous, of oxygen,.....17974
of various substances, CO_2 as affecting, ...17983
of vitamin D,.....11378
in digestive tract. (See under *Digestive tract; Intestine; Stomach.*)
lymphatic, of thorium dioxide, x-ray study, ...17999
by plants, of calcium by *Vicia,* B as affecting, ...17869
of copper by *Aspergillus,* pH as affecting, ...17929
of hexoses, by wheat and clover leaves, ...17939
of ions, by roots,.....11107
of minerals, ...17866
as influenced by soil factors, 19415
by transpiration, ...13410
of minerals and N, by oats at different vegetative periods, ...6646
of nitrates by wheat, as influenced by ultra-violet, ...9047

ingested by sponges,.....3916
injection, effect on sodium chloride metabolism, ...590
of inland lakes, count, microscopic method, ...8852
internal structure as shown by micromotion pictures, ...7594
intestinal. (See under *Intestine.*)
invasiveness of streptococci, mechanism, ...11754
involution forms, nature,.....3356
in *Pseudomonas tumefaciens*,.....4581
iron, in water supplies, identification, incidence, forms, culture media, physiology, morphology and effects on water and control, ...16382
isoelectric point, ...14365
detn. by precipitation vs. cataphoresis, ...14365
isolation from mixed cultures by ascent on filter paper,.....9851
lactic-acid, acetoin production by, 19289
in aroma production,.....16430
dehydrogenase, mechanism of action, ...12031
as influenced by non-saccharine substances in raw juices,..14305
lactose-fermenting, in fish intestines, ...11992
legume. (See *Rhizobium leguminosarum.*)
lethal effects of oxygen under pressure, as influenced by temp.,....7589
of sudden changes in temp. or osmotic pressure, ...3366
lepidopterous larvae infected by, 14191
life-cycles, monograph, ...3356
as shown by micro-motion pictures, ...7594
lime and iron deposits in thermal springs due to, ...9869
lipases, monograph, ...16473
local immunity to invasion by, in subarachnoid space, mechanism, 9589
luminescence, relation to cell integrity, ...15516
and respiration, as influenced by ethyl urethane. 15516
luminous, in detn. of metabolic activity, ...3349
light intensity as a function of oxygen tension, ...6732

Bacteria (*continued*)
luminous (*continued*)
photogenic symbiotic, from cephalopods, temp. effects and mechanism, ...9887
respiration in, sensitivity for 2,4-dinitrophenol, ...12050
respiration and luminescence as distinct processes in,.....12046
lysogenic strains, formation and perpetuation, mechanism, ...1083
manganese-oxidizing, from waters in Texas, ...5314
marine, cultural characters as influenced by low temp. and freezing, 7534
growth as influenced by temp.,..9828
rôle in fouling of submerged surfaces, ...16477
in meat, as influenced by pH,....11998
media for, general data on,.....9861
metabolism, review, ...7592
on metal dairy utensils, agar-disc method of studying contamination by, ...14332
in milk. (See *Milk, bacteria.*)
mitogenetic rays in relation to,...3362
mixed cultures, quantitative decomposition of dextrose by,.....5414
morphological, colonial and agglutinative changes induced by distilled water storage, ...5413
morphological variations in,.....3368
life-cycle vs. polymorphism in,..3361
motility, as influenced by composition of media, ...5371
inhibition by narcotics,.....5393
significance and factors influencing, ...1257
in mouth, dental caries and,.....14086
mutation in, mechanism, theory,..16466
nitrifying, activities in sewage mixtures, ...9774
in deep seas,.....8854
as influenced by temp.,.....12026
review, ...19276
nitrogen fixing. (See *Azotobacter; Nitrogen, fixation; Rhizobium.*)
nitrogen-fixing symbiotic root-nodule in *Casuarina equisetifolia*, ...9805
nodule-forming. (See *Rhizobium leguminosarum.*)
nodules on leaves of *Psychotria* due to, ...5774
non-specific factor inhibiting bactericidal action of normal serum,....3156
non-virulent, abscesses caused by, in scillaren-B treated tissues, 7485
nuclear substances in, ultraviolet light lethal to, ...16458
numbers as shown by Richards-Jahn nephelometer, ...5385
oxidation of proteins by, as influenced by carbonaceous compounds, ...16442
oxidation-reduction potentials as species characters, ...19280
O consumption, as affected by O tension, ...11452
of Palouse silt loam, activity and factors influencing, ...12027
parahemotrophic, nutrition, ...17077
pathogenic, differentiation of spp. and vars., handbook, ...3350
enrichment media for, fish roe or quahogs in, ...9833
focal cell reactions to and factors influencing, ...7370
G-colonies of Hadley in relation to filterability, ...7572
from saprophytic in trophic disturbances, ...5083
pathogenicity, factors influencing, 1004
tryptophane in relation to,.....1249
permeability to, of pharyngo-buccal mucosa, ...9704
of saclets of *Phragmites vulgaris* for various, ...14346
in phagocytes, differentiation of living from dead, by Proca-Kayser stain, ...7574
phospholipoid-destroying enzymes, 16434
photography of colonies, technic,..5410
physiological activities as influenced by iodine, ...9542
phytopathogenic, factors affecting, growth forms, ...239
pigments, chlororaphin,.....9840, 9841
inhibition in, substances causing and mechanism, ...7576
prodigiosin, ...9882

Bacteria (*continued*)
pleomorphic, in European foulbrood etiology, ...932
pleomorphism in, ...5392
as shown by micro-motion pictures, ...7594
population, effect on dilution data, 1253
postmortem invasion by, in experimental animals, ...9707
of organs, significance, ...9708
proteinase secreted by, ...2539
proteolytic, in milk separator slime, pasteurization destroying, 16435
resistance of wool fibers to action, detn. by trypsin action, ..7528
proteolytic enzymes, ...5380
protozoan infected with, ...959
prozone phenomenon, in specific bacterial agglutination, ...7352
psychrophilic, marine forms, ...9828
purple-sulphur, photosynthetic processes in, metabolism and, ...19297
putrefactive, bactericidal power of fatty acids for, ...14301
pyogenic, destruction in alimentary tract of surgical maggots, ...7479
rape-cake decomposition in soils by, factors influencing, ...1228
rate of purification of polluted streams by, ...19136
renitocytes, as life-cycle phase, ...3356
reproduction, effect on bacteriophage, ...16325
resemblance of bacteriophage to, in reaction to gonocrine 16331
resistance to disinfection, dynamics, ...5317
respiration, aerobic and anaerobic, as influenced by potassium cyanide, ...19279
as influenced by pyocyanin, hydrogen donators for, ...9819
mechanism in pneumococci, ...3365
respiratory enzymes, classification by, ...7573
resting, methods of studying chemical activity, ...5388
rôle in growth of *Colpidium*, ...14836
of Russian leavens, ...3326
schizophytoids, as life cycle, ...3356
in sea, distribution, factors controlling, ...17748
lethal action of sunlight, ...10954
sensitization by normal and immune sera, ...11813
serological groups, differentiation by bacteriophage absorption, 11908
serological relations of phage strains, ...11918
sexual reproduction in, ...3356
of silage and hay containing *Equisetum*, effect on milk for soft cheeses, ...3335
size changes induced by ultra high frequency magnetic-electric field, ...13576
small-colony variants, characters and significance, ...5391
of soil. (See also *Ammonification; Azotobacter; Nitrification; Nitrogen fixation; Humus; Soils;* etc.)
activities in podsol and peat forest soil types, ...5355
carbohydrates of pneumococcus decomposed by, ...7583
content as influenced by season and depth in soil, ...14339
crop-plant nutrients fixed by, ..12025
distribution, numbers and factors influencing, in Malay Peninsula, ...7564
effect on dicyandiamide, ...1225
as influenced by C/N ratio, ...1231
by mulching, ...1224
by partial soil disinfection, ...9810
species, genus and family concepts in, ...5402
standardization, ...19040
specific agglutination, prozone phenomena in, mechanism, ...7352
specific carbohydrates, preparation by electrolysis, ...19308
specific immunizing and precipitating and toxic properties of dialyzate, ...11741
of fraction, ...9497
spores, cytology and development, 3356
.....9855
differentiation of living from dead, by Proca-Kayser stain, ...7574

Bacteria (*continued*)
spores (*continued*)
mechanism of formation, ...16449
production, media for, ...14360
staining, potassium permanganate method, ...16468
transport for great distances by dust storm, ...16408
staining. (See under *Bacteriological technic.*)
starch-splitting, control in protozoan cultures, ...5244
sulphides in sea water and mud as produced by, ...19282
sulphur, distribution in and around thermal sulphur springs, Japan, ...16454
"lake of blood" phenomena in water due to, ...5375
sulphate reduction in water by, 5375
surface phenomena, ...4740
symbiosis, with *Calandra oryzae*, ...3369
with Curculionidae (Col.), ...12679
root nodule bacteria with legumes, ...3345
with stink-bug, ...6273
as synthesizing carotene, ...11142
of textile fibers, ...11999
thermal death time as influenced by pH and temp., ...5390
thermal resistance as influenced by hypertonic sugar solutions, 3332
thermophilic anaerobes fermenting beet pulp, ...19215
thiosulphate-oxidizing, culture and metabolism of forms causing, 7584
toxin. (See under *Toxin.*)
tropisms, effect on invasion by, ...1004
true, relationship to myxobacteria, 16449
tryptophane in metabolism, ...1249
tryptophane requirements, ...5134
in upper air, ...13165
in used nutrient solutions, effect on plants, ...17925
vaccines. (See *Vaccines;* and under specific organisms.)
for vaccines, selection by skin test vs. pathogen-selective culture, 11832
variability, ...4739
as influenced by radium, ...5416
variations in, as influenced by environment, review, ...14357
mechanism, theory, ...16466
of mutable strains in synthetic media, ...9856
and mutation in, monograph, ...3361
viability, factors influencing, ...19284
as influenced by oxides and iron oxide hydrates, ...5361
virulence, dye-resistance in relation to, ...956
fluorescence and antigenicity correlated with, ...1260
as influenced by:
antivirus, in pneumococci, ...16243
artificial cultivation, ...11940
pH, ...19302
iron oxides and iron oxide hydrates, ...5361
physiological saline vs. Ringer's sol., ...11969
resistance to O antibody, ...5131
morphology correlated with, ...9834
in water, as influenced by oligodynamic action of Ag, ...16389
removal in settling basins by clay suspensions, ...16407
x-ray lethality to, as influenced by inorganic salts, mechanism, ..1167
young forms, as life-cycle phase, 3356
Bacteriaceae (Bacteria), p.2388[1]
Bactericidal action. (See also *Bactericides.*)
of adrenal-gland extracts, 13882, 11770
of blood, in arthritis, ...9498
factors influencing, ...19015
heat-resistant factor in, ...9499
as influenced by autohemotherapy, ...16248
by mineral water ingestion in vitamin deficient rabbits, 18272
inhibition by non-specific factor in bacteria, ...8156
leucocyte vs. serum rôles in, ...9499
nature and relationship, ...16271
resistance of hemolytic streptococci from throat infections to, 5297
of Cologne water, ...16387
of condiments and fruit juices, ...16426
of enzyme from *Phormia regina* intestine, ...18048

of ethereal oils, ...16387
of fatty acids, ...14301
gram reaction correlated with, ...1251
of ketourine, clinical test, ...15777
of nascent H_2SO_3, ...1191
and "quasi-specificity" and toxicity of parachlorphenol derivatives, 7505
of radium emanations, ...5874
of rhodamine-G esters, and factors influencing, ...11959
of saliva on diphtheria bacilli, ...9514
of skin, as influenced by drugs and hormones, ...9508
tests with streptococci, as influenced by continuous agitation, and apparatus for, ...9550
of thermostabile substance in blood serum, ...14184
of ultraviolet, rôle in effect on wound healing, ...6750
of unsymmetrical diphenyl compounds, ...9749
of x-rays, ...16401
Bactericides. (See also *Antiseptics; Bacteriolysis; Disinfectants; Germicides;* and under specific bactericides, e.g., *Mercury chloride.*)
alcohol as, value, ...19201
arsphenamine as, action as influenced by splenectomy or reticulo-endothelial blockade, ...16272
azochloramid as, ...16405
chloramine-T as, ...16405
chlorine as, ...14293
chlorophenols as, chemical compositions as affecting, ...16395
chlorpicrin as, ...18757
colloidal silicic acid aluminum and iron hydroxide as, ...19198
for control of graft knots in apple, 17844
effect on soil and pathogenic microflora, ...9810
for flagellate cultures, quinanil as, ...14201
harmol and harmalol as, ...19176
metaphen as, ...791
neoarsphenamine as, action as influenced by splenectomy or reticulo-endothelial blockade, ...16272
phenol and merthiolate, effect on potencies of biological products when used as preservatives, ...19200
phenol ointment (U. S. P.) modification as, ...8297
for post-extraction (teeth) infections, ...9706
pyridin-iodine compounds as, ...7492
silver preparations in water as, ..16389
in small intestines, absence in dogs and monkeys, ...3269
sodium hypochlorite as, ...16405
thiazole-azo-dyes as, ...7506
for tubercle bacilli, comparisons of efficacy and methods of testing, ...1169
water-soluble ointment bases for, 16388
Bacteriemia. (See also *Septicemia.*)
in leprosy, ...7482
streptococcic, book, ...9727
as influenced by anaphylactic shock, ...9503
production with non-specific sensitization, ...9503
tubercle bacillus isolation from blood, by Busson vs. Löwenstein methods, ...3370
media for, ...11718
in tuberculous infants, ...1139
of umbilical cord, tubercle bacilli absent from, in pulmonary tuberculosis, ...16371
Bacterins. (See *Vaccines, bacterial;* and under specific organisms.)
Bacteriological technic. (See also *Culture media; Immunological technic; Pasteurization; Stains; Staining;* etc.; and under specific bacteria and reagents.)
acid-fastness, methods of preservation, ...3351
anaerobic culture tube, ...9886
anaerobiosis, vegetable-tissue jar for surface culture and thermophilic temp., ...14356
cage for infected laboratory animals, ...5303
calorimetry, technic, ...3364
cataphoresis, Falk cell for, ...16463
counts, of bacteria in air, apparatus for, ...19185

Bacteriological technic (*continued*)

utilization, by cardiac and skeletal muscle, nondiabetic and diabetic,.....15688
by muscle, epinephrine as affecting,.....2680
sulphate, detn., micromethod,.....487
ethereal, microdetn.,.....13440
sulphur, as influenced by ultraviolet,.....11206
non-protein, adrenalectomy as affecting, dog,.....659
detn., micro-method,.....487
sulphydryl compounds in, papain activation as test for,.....11273
supply. (See *Blood vessels; Circulation; Circulatory system;* etc.)
surface tension, of serum, variations,.....11303
of serum and plasma, fish, crustacea, and cephalopods,.....570
suspension stability, as influenced by diathermy vs. infections, dogs,.....7474
temperature, in forearm, as influenced by immersion of opposite hand in warm water,.....15907

Blood (*continued*)
test, benzidine, as test for hematin, 6828
therapeutic malarial, as influenced by blood groups of donor vs. recipient,.....19046
thiocyanate in, detn.,.....477
thrombin, as influenced by hypertonic saline intravenously,....18237
thrombin preparation from,.....556
thyroid catechin, significance,....18170
in tissues, detn. method, and variations after exercise or adrenalin injection,.....16004
toxic factor for nervous system in, after liver damage,.....16137
transfusion. (See *Blood transfusion* following.)
from ultraviolet irradiated rats, effect on thyroid, parathyroids and pituitary of rats kept in dark...13551
in umbilical cord, uric acid and bile pigments in,.....18165
urea, detn.,.....518
micro method,.....4796
urease method,.....18234
in fluoride blood,.....4772
as influenced by:
cortin, after adrenalectomy,...645
glucose ingestion,.....18175
x-rays,.....2582
in kidney diseases, daily variation,.....5034
in Malagasy,.....18334
in relation to urea content of milk,.....15815
uremia. (See *Uremia.*)
uric acid, in acromegaly, case report,.....9448
in B avitaminosis, insulin and autolyzed brewer's yeast as affecting,.....441
detn., micro-method,.....500
as influenced by:
radon,.....18130
renal tubule blockage,.....16168
tyrosine ingestion,.....11142
ultraviolet,.....2713
injected, rate of disappearance, 2694
in maternal, comparison with amniotic fluid,.....18517
in pituitary deficiency,.....16149
in umbilical cord,.....18165
variations,.....18294
urobilin injection into, disappearance rate,.....558
vessels. (See *Blood vessels* following.)
viscosity, effect on anaphylactic shock,.....19013
as influenced by diathermy vs. infections, dogs,.....7474
by excitement,.....9340
vitamin A in, as affected by carotene in diet,.....11414
vitamin A and carotinoids in, man,.....13739
vitamin D in, after ingestion, dog, 13794
volume, adjustment after transfusion,.....535
blood depots and,.....4741
changes following intravenous saline,.....18183
detn. in vivo, method,.....6812
by vital red method in man,..6837
as influenced by:
adrenalectomy,.....9225
excitement,.....9340
fluid intake, after adrenalectomy,.....5085
in pneumonia,.....5045
in pregnancy, man,.....18185
as related to body weight,.....6837
rôle in etiology of fever in diabetes,.....11646
sensitivity to adrenalin and,....5036
water content. (See also *Blood, concentration; Blood, volume; Water, balance.*)
as influenced by age, various animals,.....18230
xanthoproteic reaction, as affected by renal insufficiency, dog,....2693
Blood anticoagulants. (See *Blood coagulation.*)
Blood cells. (See also *Erythrocytes; Fibroblasts; Leucocytes; Lymphocytes.*)
agglutination. (See *Hemagglutination.*)
of caudate amphibians,.....1623
changes, after realimentation of rats on low salt diet,.....13440

Blood cells (*continued*)
character and formation, eel and trout, ...16885
of cockroach, behavior and differential count, ...17055
count, acetic acid vapor as influencing, cockroach, ...17047
differential, of bone marrow, estimation of rare types, ...18821
source and extent of error in, 8060
in fowl paralysis, ...5112
by fresh vs. oxalated blood, ...5107
in ♂ and ♀ litter-mate rabbits, 10198
method, ...4474
cytology in rabbit, ...1017
hemocytoblasts, multiplication stimulated by virus of fowl leukosis, ...1107
in Odonata larvae at metamorphosis, ...17051
origin of blood pigments as related to, invertebrates, ...6033
P, irradiated ergosterol as affecting, ...3113
in purple sea spider, morphology, ...542
of Sipunculids, types and phagocytosis, ...15352
specific antigens, in doves, hereditary behavior, ...8729
structure classification, and phagocytic activity, Coleoptera, ...10281
structure and origin, trematode (*Diplodiscus*), ...6034
surface phenomena, ...4740
types in Argentine fish, reptiles, and amphibians, ...1652
vital staining of reticulocytes and, 5985
volume, detn., conductivity method, ...11301
Blood coagulation. (See also *Blood platelets; Coagulation; Coagulants; Fibrinogen; Hemophilia; Thrombosis.*)
avoidance in blood pressure expts., ...15968
chorazol preventing, ...7251
complement rôle in, ...11774
enzymes, azo-dyes as affecting, ..17985
in fish, ...569
as influenced by:
albumin and globulin fractions of serum, ...18242
anticoagulants, ...18160
azo-dyes, ...18221
salts as affecting, ...17985
breathing oxygen, ...18211
calcium, ...6860, 11334, 18337
cations and anions, ...4804
citrate conc., ...18337
electric current, ...9085
extract of esophagus of *Bunostomum trigonocephalum*, ...19056
fibrinogen conc., ...18295
germanine and moranyl, ...846
hemorrhage, ...2629
lipid removal, ...18336
lung extract, ...6865
molybdenum, ...778
multiple myeloma, ...896
oxalate, ...6860
pereirine, ...9390
trypsin, compared with thrombin, ...18067
in insects, ...567, 7689
means of preventing, ...18261
platelets in, dark field microscopy, 17974
second phase of thrombin action in, 2646
section of book, ...18285
by thrombase, ...556
thrombocyte alterations as factor in, ...18192
time, as affected by chick embryo extracts, ...6833
by hypertonic saline intravenously, ...18237
normal human blood, ...17985
related to menstrual cycle, ...11320
Blood groups. (See also *Agglutinins; Hemagglutinins.*)
age and longevity in relation to, ...9617
agglutinins, transmission from mother to offspring, ...3195
agglutinins M and N, inheritance, 17694
agglutinogens A and B, demonstration in muscle and saliva, ...3193
book, ...5195
of Central Australian aborigines, ..3194
in children vs. adults, ...19042
classification, new device for, ...16976
of Danes vs. white Americans, ...19041
detn. from various body fluids, ...14186
Blood groups (*continued*)
effect on therapeutic malaria, ...19046
evolution, ...14186
factors, in body fluids and tissue cells, ...19041
secretion in saliva, ...5192
in fowls, ...16256
and inheritance, ...3198
group-specific receptors and their antibodies, ...7380
in guinea pigs, negative data, ...5190
hereditary antigen mosaic in chickens, ...2337
heredity and application to forensic medicine, ...14186
of horses, detn., ...9619
subgroups, ...5194
human races in relation to, ...1013
inheritance, group AB, ...2359
in rabbits, ...4430
isoagglutination in, as influenced by temp., ...5193
isoagglutinins in other body fluids in relation to, ...1012
M and N factors, antibodies for, production and paternity detn. by, ...19041
in Maya-Spanish population, Yucatan, ...13111
of mental defectives, in England, 3197
in mice, negative data, ...5190
in monozygotic twins, ...8810
in mummies, detn., ...3196, 7376
in Negroes vs. Whites, ...7379
in populations, nomogram for computing, ...4442
in pulmonary hemoptysic tuberculosis, ...5191
rabbit and human group B erythrocytes, antigenic differences, ...7380
racial relations, ...19045
in natives of British North Borneo, ...5974
reacting factors in, nature, ..7377, 7378
reactions in saliva, ...7380
of Ruthenian Czechs, Germans and Jews, ...12483
saliva-specific and sp.-specific substances secreted in, ...5192
and schizophrenia, genetic relationship, ...10831
seroglobular dissociation in aplastic anemia, ...19043
in Solomon and Fiji Islands, ...12472
of Sudanese, ...1011
of susliks, ...9618
in swine, inheritance, ...17664, 17674
and types of twins, cattle, ...2311
typing, faulty, auto-agglutination causing, ...19044
technic, ...19041
virucidal action of normal and poliomyelitis sera in relation to, 11789
Blood picture. (See also *Blood cells; Erythrocytes; Leucocytes;* etc.)
in Aujeszky's disease, ...14055
in benzol poisoning, ...11564, 18705
of cockroach, experimental modification, ...17055
detn. by fresh vs. oxalated blood, 5107
of embryonic chicks, as influenced by incubation temp., ...19395
in helminth infestation, ...3214
hemogram, Schilling, dementia praecox as affecting, ...3122
of hens, correlated with egg hatchability, ...14440
as index of resistance to transplantable neoplasms, ...1017
as influenced by:
anesthetics, ...18784
chronic CO poisoning, rat, ...16064
exposure to high temp., ...11601
hemorrhage and turpentine injection, dogfish, ...6854
high temp., ...7298
injection of erythrocyte stroma, in anemia, ...18245
operation, protein injection and x-ray treatment, ...2652
Ra poisoning, rats, ...11246
spleen ablation, in man, ...9229
S, sheep, ...7727
x-rays and radium, ...560, 18108
in lead poisoning, ...18779
in malaria, factors influencing, ...1021
in marble bones, ...5055
in measles, ...16184
in monkey malaria, ...19097
in normal duck, ...3769
Blood picture (*continued*)
section of book, ...18285
in undulant fever, ...5166
in Yucatan inhabitants, ...11330
Blood platelets. (See also *Blood coagulation.*)
count, as influenced by:
adrenalectomy, ...14116
hypertonic saline intravenously, ...18237
operation, protein injection, and x-ray treatment, ...2652
trauma and massage, ...552
as related to menstrual cycle, ..11320
counting method for, and normal range, ...16889
dark field microscopy, in clotting, 17974
formation in megacaryocytes in bone marrow, ...3767
fragility, detn., method, ...11142
immunity rôle, ...5164
in malaria, structure and number, 3080
origin in bone marrow in cases of hemophilia, ...18821
origin and relation to reticulo-endothelial histiocytes, ...1661
reduction in nos. in carcinoma metastases to bone marrow, megakaryocyte structure in, ...9430
rôle in blood coagulation, ...18192
thymonucleic acid in, detection, ..13604
Blood pressure. (See also *Blood vessels; Circulation; Circulatory system; Heart; Pulse;* etc.)
in acromegaly, ...16123
in anaphylactic shock, factors influencing, ...9573
in aorta and coronary artery, coronary flow as affecting, ...18693
arterial, effect on diameter of cerebral vessels, ...15942
as influenced by occlusion of pulmonary artery before and after spinal transection, dog, 18673
lateral, estimation, ...17974
new hypodermic manometer for recording, ...11527
arteriosclerosis and, ...11677
in both arms, detn. method and results, ...3002
capillary, review, ...15986
cardiac output detn. from, ...17974
cerebral, rôle in convulsions, ...11554
cerebrospinal pressure in asphyxia and, ...622
depressor nerve as regulating, ...18615
detn., direct method, unanesthetized dog, ...767
differences in arms, method for recording, and factors affecting, 11541
effect on:
kidney function, during spinal anesthesia, ...2870
muscle contraction, ...727
in heart, as influenced by ligation of branch of coronary artery, 11519
high, basophilic invasion of neurohypophysis in, ...16106
blood iodine in, ...489
blood lipoids in, ...18936
carbon arc radiation as affecting heart output in, ...5049
discussion of causes, ...15957
due to epinephrine, as a cause of pulse changes, ...7214
Duroziez's sign in, ...11619
essential, pressor substance in blood in, ...18324
as influenced by pituitrin and epinephrine, ...16027
inheritance, ...10804
kidneys in malignant, histopathology, ...9410
as related to arteriosclerosis, book, ...18905
surgical therapy, ...16180
effect on kidney function, ..11667
urine as affected by, ...15785
in histamine shock after ablation of digestive tract, ...4955
human, mean and diastolic values, 15953
as influenced by:
acetylcholine in aortic regurgitation and in normal, ...11545
acetylcholine compounds, ...9399
acetyl-β-methyl choline, ...9382
adrenal ablation, dog, 643, 767, 18658
adrenal ablation and hypophysectomy, ...17974

Blood pressure (*continued*)
as influenced by (*continued*)
adrenal cortex extract,.....16155
in schizophrenia, ...13873
age, diet, occupation and sex, in East Indians, ...16010
amines, ...3026
amyl nitrite, mechanism,.....3030
amylamine, ...843
anesthetic drugs, ...767
aortic distension during systole, 15609
aryl ethers of choline,.....11555
cactus extract, ...812
camphor, ...4975
CO_2 bath, ...16006
carbon monoxide poisoning,.....782
carotid sinus reflex,.....18675
carotid sinus stimulation, in cardiac diseases, ...16012
codeine isomers, ...16032
distension of small intestine,..18440
drugs, ...816
in sympathectomized cats after section of vagi,.....9348
electrical stimulation of articular capsule of knee in rabbit, 9346
ephedrine, ...3061
ephedrine and pseudo-ephedrine, ...11548
epinephrine, in hypertensive subjects, ...15970
marmot, ...18753
epinephrine and atropine,.....9366
epinephrine and $NaNO_3$, temp. as affecting, frog, ...752
exercise, ...18664
weighted military marching, 15977
extract of stomach fundus,.....2824
food intake and exercise,.....18682
harmalol, ...3043
hemorrhage, after pituitary removal, dog, ...13838
high intracranial pressure, reflex regulation by carotid sinus, 759
inhalation of ionized air,.....11194
insulin, ...18701
in ether anesthesia,.....7234
intrapleural pressure, ...15954
isomers of amyl nitrite,.....834
ligation of renal arteries, dog, 11526
methylhistamine and hydroxyethyl-glyoxaline, ...14020
molybdenum, ...778
mud baths at various temps.,..18669
neosin, ...7223
nitrites, drugs as affecting,....16045
partial ligation of renal vein,...2865
pereirine, ...9390
pericardial pressure, ...18657
posterior lobe basophilia,.....857
quinamine, ...11547
respiration, dog, ...15960
section of carotid sinus and depressor nerves, ...15983
NaCl, after adrenal ablation, dog, ...7079
stimulation of vasomotor centers in medulla in sympathectomized cats after section of vagi, 9348
strontium, ...4989
sub-cardiac vagus stimulation, 9316
subtotal nephrectomy before and after decerebration and pithing, ...18663
temp., frog, ...752
tracheal respiration, ...11540
tropane group, ...7238
tyrosine, ...836
ultraviolet, college women,.....6746
in liver in ascites, correlated with cell changes, cats, ...850
low, drugs in,.....11561
effect on visual field,.....11474
shock and, ...5036
maximum, detn., mathematical method, ...2990
maximum, mean and minimum, experimental study, ...764
measurement, book, ...16000
in domestic animals,.....18152
of systolic, book,.....11265
normal values for aviators,.....776
oscillographic and auscultatory criteria, ...18695
in peptone and histamine shock, 18935
in psychotic states,.....14091
pulmonary artery, as affected by epinephrine in rat,.....16005
by inhaling compressed air,...616
pulmonary edema and,.....16132

Blood pressure (*continued*)
pulse, basal metabolism prediction from pulse rate and,.....11355
recording, new technic,.....15968
reflex control, ...18660
relation to pressure in inner ear, caloric stimulation as affecting, 18595
in right ventricle and pulmonary artery, as affected by air pressure in lungs, rabbit, ...18655
in schizophrenia, adaptation as affecting, ...16144
systolic and diastolic of body parts, hydrostatic pressure as related to, ...18695
tracings, vagus section and carotid sinus elimination as affecting Traube-Hering waves in,.....11533
in typhoid carriers,.....11941
venous, in arm, as affected by compression, ...763
cerebrospinal pressure and, in heart failure, ...5040
detn., indirect method, ...15952
method for recording graphically, ...15954
posture as affecting,....15989, 17974
ventricular, negative,.....15955
water balance as related to blood urea N and, after adrenal ablation, dog, ...7080
waves of 3rd order in, nervous mechanism, ...720
of Yucatecans,....9675, 11330, 18686
Blood serum. (See also *Antiserum; Serodiagnosis; Serology.*)
agglutinative activity as influenced by pregnancy, ...9599
agglutinin content and persistence, after typhoid and paratyphoid immunization, ...11763
allergic, effect on normal skin, nature, ...19089
allergy to horse dander and, antigenic relationships, ...19035
anti- complementary, multiple myeloma in relation to,.....896
antidiphtheria, physical properties, ...13476
antilipolytic, use in treatment of polyneuritis and multiple sclerosis, ...16055
antipneumococcus properties of normal swine, ...985
antitryptic activity, ...11318
apparatus for pipetting,.....5205
bactericidal activity, heat-resistant factor in, ...9499
nature and relationship, man,..16271
bactericidal properties of normal, specificity and factors influencing, ...3156
cancerous, antilytic factors in,....3183
cataphoresis and dye-combining capacity, ...17998
chemistry of proteins and carbohydrate-protein groups in antibodies vs., ...19001
conductivity as affected by pregnancy, man, ...18185
corneal reaction to foreign, in syphilis, ...16232
culture, growth of tumor cells in, 16172
of eel, hemorrhages of skin following intravenous injection of starch after intradermal injection, 7348
toxicity, ...11841
effect on:
autolysis of blood clot,.....11318
blood monocytes, ...18176
diphtheria antitoxin content of blood, ...11780
fermentation of glucose by yeast and of pyruvic acid by *B. coli*, ...13378
fibroblast races, ...17028
fibroblasts, in vitro,.....1724
hemolysis by saponin,.....18187
hyoscine isomers, ...7250
respiration in tissue culture of liver cells, ...11455
Trypanosoma rhodesiense, ...1023
enzyme content as compared with colostrum, ...4885
and fibrin from syphilitics, specific antigen identical in,.....9527
filtrate, spectroscopic analysis,...15769
freezing point, detn.,.....6772
gelification in tuberculosis,.....16163

Blood serum (*continued*)
gonadotropic substances in, mare,..636 .....676, 7003, 7125, 18460
in pregnancy, chemical properties, 642
effect on pituitary size, rat,..637
hemolytic, as influenced by extracts of maize seed, ...9541
by pregnancy, ...9599
homologous immune, effect on flocculation of bacterial extract, as influenced by benzoin tincture, ...9743
homologous vs. heterologous, mechanism of effects on animal organism, ...9565
pH, differences in colorimetric and electrometric detns., horse,...18045
immune, effect on *Shigella dysenteriae* in cultures, ...3176
immunological comparison of native vs. denatured vs. reversed albumin in horse, ...990
individual antigens M and N, group-specific antisera for, prep. technic, ...5154
heredity and distribution in Italians, ...5155
inhibitory to thyreotropic hormone, ...17974
production, rat, ...2627
inorganic P in amniotic fluid and, comparison, ...18517
light filtering index, clinical application, ...18286
lipase action, from different species, ...18045
lymphatic ganglial reactions to poisoning by, ...9526
mineral water effect on, as determined photometrically, ...11329
normal and immune, sensitization of bacteria by, ...11813
normal and poliomyelitis-convalescent, immunological characters, 11789
normal horse, effect on Schick test, mechanism and factors influencing, ...982
on Shwartzman phenomenon refractivity factors in snake venom, ...11818
water-soluble proteins, properties in antipneumococcus sera compared, ...5182
oxidocatalysis, cancer affecting,....903
pneumococcus leucocidin as influenced by normal, ...9568
precipitin in anaphylaxis, quantitative relations, ...19006
precipitinogenic action, mechanism, ...9533
protein in amniotic fluid and maternal, comparison, ...18517
skin-sensitizing antibody in, in hypersensitivity, ...7371
specific gravity, in monkeys,.....2678
surface tension, in fish, crustacea, and cephalopods, ...570
swelling of gelatin in,.....13607
syphilitic vs. non-syphilitic, qualitative differences in, ...7347
thermostabile bactericidal substance in, occurrence, properties and reactions to, ...14184
trypanocidal power, ...11853
and factors influencing,.....11856
nature and relationship, man, 16271
Blood transfusion. (See also *Transfusion.*)
allergy transmitted by,.....3185
avian leukemia transmitted by, mechanism and factors influencing, ...14261
blood volume adjustment after,....535
danger of successive, with two blood types, ...19043
donors as affected by,.....2649
effect on:
blood composition in donor and recipient, ...18262
Fe elimination, ...18180
O consumption in donor,.....18263
phagocytosis by reticulo-endothelial cells, ...11775
erythrocyte persistence determined in, ...19043
indication and technic, book,.....5195
as influenced by temp.,.....5193
M and N factors in relation to,...19041
section of book,.....18285
tumor transplantation by,.....911
universal recipients in infancy,..19042

Blood vessels. (See also *Blood pressure; Circulation; Circulatory system; Pulse.*)
anomalies, associated with coalesced kidneys, rabbit, ...1742
in frog, ...3878
in human fetus,.....6021
area in compacta in human long bones, ...19839
in brain, in hyperinsulinism, histopathology, ...11608
as influenced by arterial pressure, ...15942
of medulla oblongata, regulation mechanism, cat, ...772
pulsation, factors affecting, 15956
reaction, to electric currents,..871
relation to circulation and respiration, ...17974
cardiac, obstruction, effect on cardiac muscle, ...11639
of central nervous system, innervation in human fetus,.....1663
changes in muscular dystrophy, 5065
of chorion, origin in human embryo, ...12495
chromotropic substance in walls, nature and behavior after ligation of vessel, ...9405
collateral, in antral floor, to teeth, in man, ...12450
coronary, dilatation by drugs, effect on cardiac disturbances due to intravenous injection of air, ...11525
distribution to right and left ventricles, man, ...15964
drugs as affecting post-pituitary extract action on,.....817
efferent constrictor nerves to, vagus as pathway, ...17974
ligation, effects, ...16132
occlusion, ...13455
effect on carbohydrate metabolism of cardiac muscle, ...11645
reflex dilatation on, as stimulation of visceral nerves,...15972
defects, hereditary syndromes, 10825
dilatation, caused by CO_2 bath, 16006
of earthworm, rate of contraction as affected by temp. and anesthesia, ...2987
elasticity, as influenced by muscular element, ...15991
mathematical analysis, ...15991
electrical excitability as affected by codeine phosphate and theocin sodium acetate, ...15984
endothelium, phagocytic activity of compared with lymphatics, ...16895
of eye, dilation caused by stimulation of ciliary process, effect on ocular tonicity, ...2941
as influenced by atropin and eserin, ...11481
rôle in absorption of crystalloids from anterior chamber, ...18570
of femur, closed system in, exp. evidence for, ...16086
fluid exchange through walls, mechanical factors in,.....16007
to glands, salivary and mammary, development of centralized and decentralized types, ...12488
great, bile deprivation as influencing, histopathology, ...18868
of head of chick embryo, development, ...19905
in hemorrhages from pharyngeal ulcers in scarlet fever, histopathology, ...18884
hepatic, drugs and shock toxins affecting, ...921
hypotonia, studies on,.....18907
as influenced by:
adenylic acid and adenosine, man, ...13454
adrenal secretion and epinephrine, after sympathectomy, man, ...7193
drugs, umbilical cord and placenta, ...820
electric current, ...9085
isomers of amyl nitrite,.....834
Janus green, ...793
innervation, histology, ...8069
intestinal, in cyclostomes.....16863

Blood vessels (*continued*)
lesions, in hemorrhagic pancreatitis, ...5009
in luetic aortitis,.....14038
to lungs, as affected by epinephrine in frog, ...15998
to mammae, relation to parenchyma during lactation, ...14716
microscopic observations on living transilluminated mammalian spleens and parturient uteri, ...15981
to muscle, as affected by sympathectomy, ...15969
dilatation, reflex and chemical mechanisms in, ...11531
effect on contraction,.....728
to nerves of lower extremity, man, ...19787
in new born infants, comparison, peculiarities, ...15959
omphalo-mesenteric, persistence, man, ...1624
origin and function, vertebrates, ...16891
to ovary, ...1624
pain stimulation in, by chemical means, ...7185

to fat production, *Aspergillus*, ..17886
to hardiness in plants, ...13357
to protein metabolism in plants, 17935
as seed reserves, in Bromeliaceae, 6685
of soybean, nutritional value, ...15629
storage, in plants, effect on daily course of photosynthesis, ...15589
by yeast, as influenced by sugars, ...17883
tolerance. (See *Glucose, tolerance; Sugar, tolerance.*)
translocation, in banana, ...372
from leaves into stems, ...6677
Carbolic acid. (See *Phenol.*)
Carbolineum sprays. (See *Tar, distillates.*)
Carbon. (See also *Charcoal.*)
assimilation, in plants. (See *Photosynthesis.*)
cycle, acidity produced by changes in, computation, ...6648
nitrogen ratio, effect on nitrogen changes in stable manure and animal excreta, ...16440
of mulch, relation to nitrate accumulation in soil, ...5356
in natural systems under oxidation, constancy, ...16442
nutrition, *Saprolegnia*, ...17888
organic, detn., micromanometric method, ...11142
in sea water, ...9120
in soil. (See under *Soil.*)
sources, for luteic acid production by *Penicillium*, ...13375
suspension, injection, effect on erythrocyte count, ...6819
in urine. (See under *Urine.*)
Carbon dioxide. (See also *Carbonic acid.*)
in air of stables, ...9959
assimilation. (See *Photosynthesis.*)
bath, effect on blood vessels, ...16006
in blood. (See under *Blood.*)
in bone as determined by modified Krogh-Rehberg apparatus, 11142
carbamino-bound, in hemoglobin solution, chemical detn., ...13454
detn., of dissolved, modified Van Slyke method, ...10835
in humic waters, ...15873
method, ...493
radiometric method, ...459
diffusion rate in tissues, detn. method, ...11457
effect on:
alkali reserve in blood of marine animals, ...2651
artificial ripening of oranges, ..5641
bacterial growth, ...5370
development, chick embryo, ...16552
grasshopper embryo, ...11335
diphtheria bacilli, ...16450
dist. and migration of plankton, 10942
frozen egg products, ...14318
pH, of body fluids in earthworm, buffer value of $CaCO_3$ from calciferous glands, ...13515
of plant tissues, ...13355
injury potential and excitability of frog muscle, ...15938
mitosis in *Tradescantia*, ...17608
morphogenesis of *Dreparnaldia* (alga), ...12279
muscle phosphoric acid during activity, frog, ...2974
mushrooms, ...1415

Carbon dioxide (*continued*)
effect on (*continued*)
oxygen dissociation curve of blood, frog, ...11333
percutaneous absorption of various substances, ...17983
photosynthesis in continuous light, ...378
protoplasmic streaming, *Nitella*, antagonism by salts, ...13340
respiration in fish, ...18416
retina, frog, ...11488
seed germination, *Poa compressa*, 4737
vitamin C in orange juice, ...2787
x-ray injury, ...17974
as fertilizer for field crops, ...1397
of forest air, sources, ...3547
hemoglobin compound, crystallization, ...2687
inhalation, effect on:
adrenalin response to histamine, ...13454
after-images, ...11473
blood sugar, ...13683
mechanism, ...16135
bulbocapnin catalepsy, ...18762
calcium and phosphorus retention, rats, ...13592
chest and abdomen circumferences, ...18423
eosinophile count, ...528
hearing, ...11472
oxygen poisoning, ...17974
peripheral vision, ...7182
prevailing respiratory reflexes, ...18425
respiration, ...17974
respiratory exchange during exercise, ...18411
respiratory movements, costal and abdominal, ...13819
urine secretion, ...17974
interchange through visceral pleura, ...18434
intraperitoneal and intrarectal injection, effect on pulmonary ventilation, ...18437
narcosis by, in *Nitella*, ...13340
permeability of veins to, compared with mineral acids, ...13482
production. (See *Fermentation; Metabolism (respiratory and energy)* and *(tissue and cellular); Respiration (plant).*)
reactions in buffer systems, kinetics, ...11142
rôle in dist. of plankton organisms, ...15447
rôle in photosynthesis, *Narcissus* and *Hyacinthus*, ...15588
rôle in regulation of circulation in medulla, ...772
in soil. (See under *Soil.*)
soil air concentration, detn. and factors affecting, ...12019
as influenced by crop and soil treatment and fallow, ...3346
in storage rooms, effect on:
chilled beef, ...9785, 9786
color changes in lean meat, ...7527
fat of meat products in cold storage, ...7539
use in control of apple storage diseases, ...4629
tension, in air sacs of birds, ...11451
alveolar, when breathing O, relation to O and water vapor pressures, ...18431
as influenced by low atmospheric pressure, ...13818
....18427, 18432
in urine of acidosis, ...15780
transport, review, ...18417
Carbon disulphide, in ant control, ...1273
in *Brachyrhinus* control, ...1306
in *Dendroctonus* control, ...9950
as fumigant for cereals, ...7688
poisoning, effect on genitalia, ...18761
in thrips control, ...1329
in wireworm control, ...3424, 7680
in woolly aphis control, ...12066
Carbon monoxide, acclimatization to, ...17984, 17986
detn., in expired air, new technic, 6773
effect on:
adaptation of eye, ...18581
condition and erythrocyte resistance and on bactericidal and hemolytic complement, ...9536
embryonic fish heart, ...17974

Carbon monoxide (*continued*)
effect on (*continued*)
leucocyte and erythrocyte counts, ...11453
muscle pH, ...4946
nitrogen absorption from air by lupine seed, ...347
oxidation-reduction potentials of starfish sperm, ...11257
oxygen consumption and after-potential in nerve, ...18633
respiration, in *Azotobacter*, ...11260
of embryonic cells, ...17974
plants, ...9026
of *Thea* pollen, ...13371
sensitivity of peripheral vision, ...18581
tyrosinase activity, ...13486
vision, ...7188
exposure to low concentrations, effects, ...11453
hemocyanin combination with, ...561
hemoglobin, detn., photometric method, ...2609
physical chemistry, ...2679
hemoglobin, union with, theoretical considerations, ...13440
poisoning, antidotal action of methylene blue and glutathione in, ...3025
chamber for administration of O and CO_2 mixtures, ...2610
chronic, effect on blood picture and reproduction, ...16064
studies on, ...782
uptake by erythrocytes, rate as determined by diffusion and reaction velocity, ...13613
Carbon tetrachloride, as chicken anthelmintic, ...16279
-ethylene dichloride, in thrips control, ...16506
in *Dendroctonus* control, ...9950
effect on gravid rabbit, ...18772
in fossil preparation, ...16810
as fumigant for cereals, ...7688
for figs, ...7616
necrosis in poisoning by, comparison with malignancy and virus infections, ...5260
as ovine anthelmintic, ...3216
as pigeon anthelmintic, ...11868
toxicity, as influenced by Ca, ...7252
to mites, ...12080
Carbonate(s). (See also specific carbonates, e.g., *Calcium, carbonate, Sodium, carbonate.*)
detn., radiometric method, ...459
effect on photosynthesis in *Chlorella*, ...9010
Carbonic acid. (See also *Carbon dioxide.*)
activity coefficient in muscle tissue, 740
Carboniferous, p.2487
Carboxyl group, as essential to action of arginase, ...18013

Actinomyces necrophorus from calf diphtheria, morphology, isolation, culture, immunity and inoculation studies, ...7331
Aerobacter transcapsulatus from amniotic fluid, ...1265
Cattle (*continued*)
age at first calving, relation to management and breed, ...12133
albinotic color dilution, inheritance, ...2285
anaplasmosis in, ...5221
experimental transmission, ...9674
Louisiana, ...3221
types and treatment, ...1032
vectors, ...3219, 11891
arterial changes in, histopathology, ...18958
basal metabolism, relation to size and surface area, ...12127
beef, fattening, feeds for, high vs. low protein rations, ...5499
sugar beets as, ...5504
as influenced by castration, ...5499
quality as influenced by crossing with Brahman, ...12118
blood Ca in pregnancy and lactation, ...18962
blood comp., in New Zealand, ...6829
blood mineral partition between cow and calf, ...18156
blood-serum albumin and albumin/globulin ratio in health and disease in adult and young, ...5111
blood solids as influenced by various factors, ...3446
blood sugar and Ca in health and disease, ...11705
blood and lymph plexuses in digestive tract, ...10232
blood and milk catalase as related to age and stage of lactation, 4757
blue-tongue disease, ...7451
body rot, butter-fat production and, ...17681
change after feeding, ...1337
bone strength and milk yield as influenced by Ca-deficient rations, ...9953
Boophilus on, ...20126
breeds, Brahman, use in breeding beef cattle, ...12118
value in cross breeding, Australia, ...1351
Galloway-Holstein crosses, color inheritance, ...13096
German lowland dairy, feed utilization by, ...14430
Jersey, inheritance of milk production and butter fat % in, ...7716
Red Africander, origin and history, ...3449
as related to vitamin A and carotene in milk, ...6939
Rumanian, butterfat characteristics, ...1336
bulls, imported into Lüneberg, influence on herd characteristics, ...1361
indexes, validity, ...9955
sterility in, etiology, detection and control, ...14134
occurrence, ...7137
bull-calf selection, pedigree analysis in, ...2286
butterfat production, related to no. of teats, ...19381
calf(ves), arterial anastomoses in elbow region, ...19841
blood chemistry in trypanosomiasis, ...3229
Cotylophoron in, ...5229
cranial parasympathetic ganglia, structure, ...5917
diet, value of KI in, ...1359
digestion derangement in pail-fed, cause and control, ...11724
evacuation of stomach as influenced by fat in milk, ...7728
mycotic dermatitis in, ...18949
white spotted kidney, *Brucella abortus* in etiology, ...7325
as carriers of Gärtner bacilli, ...5096
catarrhal fever, cross immunization tests with Borna disease, ...14194
cellulose-decomposing microorganisms in alimentary tracts, ...9470
ciliates in, ...14830
coccidia carriers, ...3214
coccidiosis in. (See *Coccidiosis.*)
contagious pleuropneumonia, morbidity and mortality as influenced by season, ...14264
types and lung lesion in, ...19154
contagious typhus. (See *Rinderpest.*)
copper poisoning in, ...955
Cattle (*continued*)
Corynebacterium ovis infecting, Australia, ...931
cysticercosis, in Syria, ...1063
dairy. (See also *Dairying; Milk.*)
age, wt. and size, effect on milk production, ...7728
blood P as influenced by age and P intake, ...7728
blood sugar, diurnal variations during lactation, ...526
body temp. as influenced by fly sprays, ...3463
by green pastures, ...7728
breeding and selection, in New York, ...12124
costal angle and constitution of hair correlated with milk production, ...3459
dry period and mineral supplements as affecting milk production, ...7728
energy metabolism in, as affected by P deficiency, ...2709
feeding exps., as influenced by body wt., ...7728
feeding and sire tests, ...7741
feeds for, ...7728
alfalfa silage as, ...7728
alfalfa vs. timothy hay in, ...3455
Artemisia silage as, ...3445
artificially dried hay as, ...7720
cane molasses as, ...7728
carotene and vitamin A in, ...7728
cereals as, ...7728
cod liver oil concentrate in, effect on vitamin D in milk, ...6965
comparative effectiveness of P supplements in various forms, ...4855
cottonseed meal as, ...7728
digestibility coefficients of various, ...7714
effect on butter color and vitamin A content, ...1348, 13744
fat-containing, effect on fat content of milk, ...7703
grass silage as, ...5549
grasses as, nutritive value as influenced by method of feeding, ...1347
hay as, ...7728
herring meal as, ...7725
high vs. low silage rations, ..14428
Lespedeza straw vs. soybean hay, ...19382
lupine silage as, ...12129
N-fertilized timothy vs. alfalfa, ...7728
oat and pea silage as, ...7728
potato mash as, ...14435
protein, ...9958
rape and linseed cake as, ...3444
raw rock phosphate in, effect on F in tissues and organs, 18353
roots vs. silage, ...1353
silage as, ...1355
sugar beets as, ...5504
sugar-beets and other root crops as, ...5490
sugar beet leaves as, ...1363
utilization and mineral balance as influenced by P deficiency, ...12135
vitamin A in, ...7728
grazing habits as influenced by pasture management, ...1349
leucocytes, milk production related to, ...7728
metabolism as influenced by temp. of environment, ...7728
mineral metabolism, ...7721
pasture supplements, ...1343
P and Ca metabolism, effects of low Ca rations, ...13440
P requirement during growth and gestation, ...1350
rôle of individuality in milk production and oxidation of milk fats, ...7728
vitamin A requirements, ...19380
water consumption as influenced by succulence of ration and amt. of milk produced, ...7704
deficiency disease, iron and liver therapy, ...11704
dermatitis due to filaria, ...9652
development of permanent teeth in, ...19737

Cattle (*continued*)
digestive tract, rate of passage of inert materials through, ...11430
diseases of Gärtner's ducts in cows, general study, ...957
in Kenya Colony, ...16585
distomatosis of pancreas. histopathology, ...19072
Distomum transmission to, ...1040
East Coast fever. (See *Piroplasmosis.*)
epiphysis cerebri, functional activity and structure in young and old, 11728
estrus abnormalities in, nomenclature for, ...9273
Fasciola in, histopathology, ...5211
feeds for, grasses vs. legumes, ...7728
milk by-products as, digestibility, ...5489
mineral nutrition as influenced by, ...7705, 7706
fetus, iron content of liver, ...2750
gastric hunger mechanism in, ...9203
genetics of the Hereford pattern, 2302
in Germany, data from cow-testing associations, book, ...1364
glomerular number in kidney, ...19802
haemorrhagic filariasis in, etiology, ...16301
helminths in, from East Indies, ...1045
4th stomach, estimation, ...7436
hemoglobinuria associated with intestinal infection by *Clostridium welchii* in, ...14143
horn, amino acids in, ...579
hypocalcemia in, ...933
inbreeding in, ...9956
infectious abortion. (See *Abortion, contagious.*)
infectious diarrhea epidemic in, ..16205
inheritance in, ...9955
of milking capacity, review, ...2278
of semi-hairlessness, ...4425
of white-spotting, ...4435
Johne's disease, diagnosis and eradication, ...941
lactation in, as affected by prolan, 7054
correlated with milk production, 5500
lactation curve, genetic detn., ...13070
live weight, detn. by body measurement, ...14433
lung, histology of acini and terminal bronchioles in, ...5937
lymphatic drainage of head in, ...19731
lymphatics of shoulder region in, ..19729
Lyperosia on, biology and control, 14396
mal de caderas as form of rabies, 14266
mastitis in. (See *Mastitis.*)
microfilariae in, in Wisconsin, ...14200
milk production. (See under *Milk.*)
milk sugar as influenced by blood sugar, ...5511
Mimosa invisa toxicity and pathology in, ...7316
mineral deficiency diseases in, causes and control, ...11716
myiasis, ...14400
nasal granuloma in, etiology and treatment, ...11884
nematoda in, ...16299
in Florida, ...16288
nodules of mesenteric lymph nodes, etiology and histopathology, 3226
nutrition and feeding exps., improvement, ...7728
Oesophagostomum in, incidence in Ohio, ...1044
osteomalacias in, causes and control, Sweden, ...14146
ovary, carotin in, ...12428
development in, ...6004, 19797
overstocking and overgrazing, and poisonous weeds, Texas, ...1576
papillomatosis in, transmission and immunity studies, ...11713
paralytic rabies, immunization to by cerebral emulsion from inoculated horses, ...9642
parasites and diseases, in Uganda, 14203
periarteritis nodosa in, and relation to human disease, ...16206
piroplasmosis. (See under *Piroplasmosis.*)
poisoning, by buds of *Quercus cerris,* 3140
pregnancy in, diagnosis by methods of Dienst and Costa, comparison 2897
primary mesothelioblastoma of parietal great omentum in, pathogenesis and histopathology, ...7324
progeny sire test, poor producers as dams, ...12139
Cattle (*continued*)
progeny test and individual performance, ...17670
Protozoa from, in China, ...1764
protozoan diseases, control, ...14402
effect on blood chemistry, ...5223
pyelonephritis and urocystitis in, *Corynebacterium renalis* from, ...5102
redwater. (See *Piroplasmosis.*)
reproduction, as affected by gonad transplants, ...9248
by iodine ingestion, ...4851
stimulation by pregnancy urine, 5492
as reservoir of equine trypanosome, in Panama, ...19074
of human schistosomiasis, ...1050
screwworm on, control, ...12084
"soil" diseases, distribution and factors influencing, ...3142
sperms, technic for obtaining, ...7139
spirochaetes from stomachs, ...7578
stables for, air conditions in, ...9959
stephanofilariasis in, ...3967, 16287
